High Performance
Air-Conditioning

The PAC range from Mitsubishi Heavy Industries Thermal Systems is ideal for air-conditioning in offices, shops, restaurants, and bars, as well as other commercial environments. The versatility of the PAC range, offers you a wide selection of models in function of your installation needs. The modern and attractive design of our indoor units is harmoniously integrated into any atmosphere creating a pleasant and relaxing environment.

Hybrid

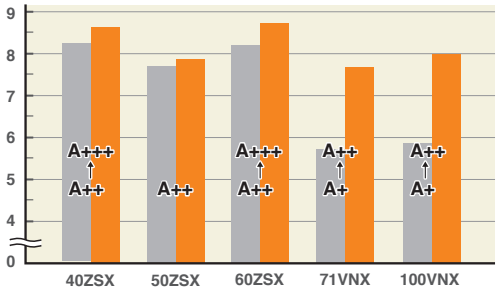
- Automatic energy saving control
- Keep maximum comfort with minimal draft
- Quiet operation

High energy efficiency with new technology

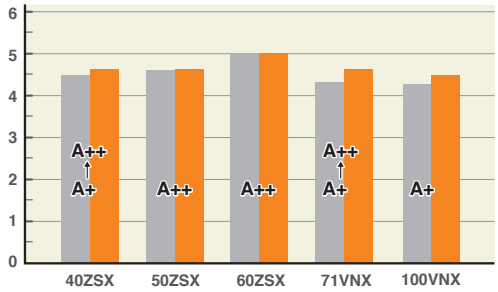
FDT can achieve higher seasonal efficiency by utilising Mitsubishi Heavy Industries latest technology.

● SEER and SCOP is defined in European regulations. Please refer to P112.

SEER in cooling Previous(VG(R410A)) New(VH(R32))



SCOP in heating Previous(VG(R410A)) New(VH(R32))



Quieter noise & Improved aerodynamic performance of the unit

New technology achieved low noise while keeping capacity and comfort by reducing the pressure fluctuation in an indoor unit.
A fan guard ensures both safety and quietness.

Turbo fan

Fan guard
(standard equipment)

Various panels available

You can choose white and black panel according to the atmosphere and purpose of the room.

White panel
(Fine snow)

Black panel
(Shadow black)

New flexible flap control for draft prevention

Draft Prevention Panel (Option)

Each of the 4 flaps can be controlled individually at each operation mode. They change air flow direction and prevent drafts occurring. This function also provides flexible control of air flow direction.

Motion Sensor (Option)

Motion sensor (option) detects human activity. Energy saving control is achieved by shifting set temperature according to detected amount of activity.

Ceiling Cassette
4way compact

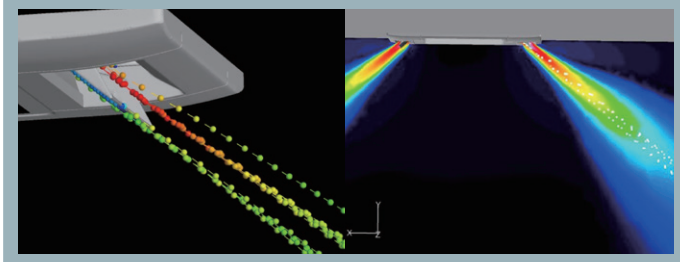
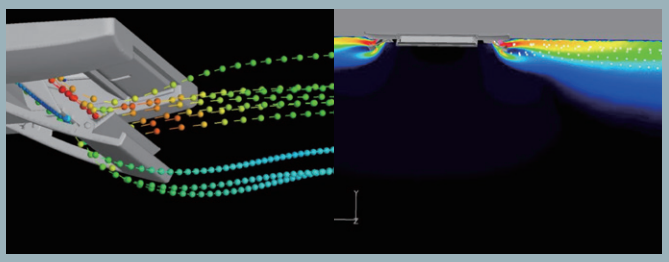
Draft Prevention Panel Operating Image

Draft Prevention Panel off



Draft Prevention Panel working *



Draft Prevention Panel provides a comfortable airflow without any draft feeling. Whether cooling or heating a room, the remote control can be used to instantly suppress any warm or cool drafts. This accurately assists how air flow is directed out of the indoor unit.

* Images is for illustration purposes.

Motion Sensor

Energy saving operation by detecting human movement

3 Step Control

1	Power Control	Motion sensor (option) detects human activity. Energy saving control is achieved by shifting set temperature according to detected amount of activity.
2	Stand by	Unit will go on stand-by mode when no activity is detected. When the motion sensor detects activity again, the unit it will automatically re-start operation.
3	Auto Off	Unit will go off automatically when no activity is detected for 12 hours.

*2 Absence for 1 hour ⇒ Operation stops (“Stand-by”) 12 hours absence ⇒ Operation stops completely

New! Design Remote Control

RC-ES1

- Simple and sophisticated design
- Compact size (86×86mm)
- Remote control with Bluetooth® wireless technology

You can control the air-conditioner by installing App on your smart phone

M-Air PRO

GET IT ON Google Play

Download on the App Store

Search for "Smart M-Air PRO" from the Google Play™ store for Android™ and App Store for iPhone.

Please check the app stores for the latest supported OS version information.

App Store and iphone are registered trademark of Apple Inc.
Google Play and the Google Play logo are trademarks of Google LLC.

Wireless connection

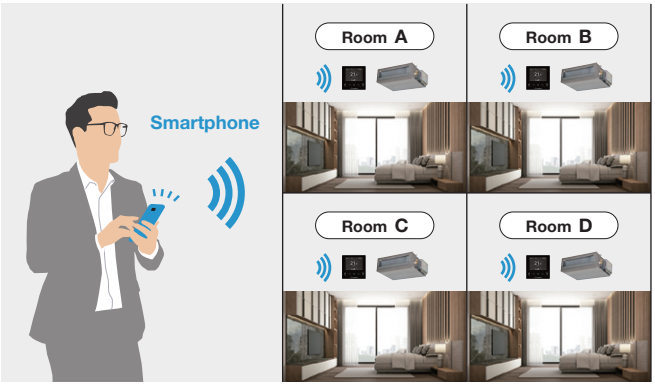
- Remote control with Bluetooth® wireless technology
- Easy set-up of indoor units
- Notifications of abnormal conditions or operational data from the remote control will be sent to your smartphone.

Information screen

By looking at the information screen, you can check the current operating conditions at a glance.

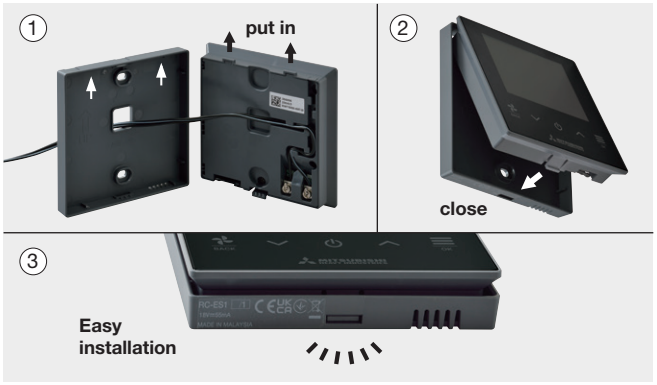
Central management by smart phone

You can select and change the settings of multiple rooms with only one action on your smartphone.*



Easy installation with the new casing structure

The casing is separated into the lower and the upper case.
By inserting the upper case into the lower case embedded to the wall, the remote could be easily installed.



*The function would be available when the smartphone is connected to the remote control with Bluetooth® wireless technology.

Easy to instinctively operate with simplified icons

Operation settings

- Weekly timer setting
- Sleep timer setting

Remote Control

Simple use with advanced settings REMOTE CONTROL

RC-EX3D

Function Switch

The function switch allows the user to select preferred two functions that are desired from the seven available functions shown.
These functions can be used by simply pressing the button after they are set, allowing you to use your preferable functions immediately.

1. Draft prevention ON/OFF

Anti draft can be turned ON/OFF with a single tap of the button.

2. High Power Mode

15 min

High Power Mode achieve excessive cooling / heating capacity in 15 minutes to quickly adjust the room temperature to a comfortable level.

3. Energy Saving Mode

Temperature is set to be optimized to save energy without losing comfort.

4. Quiet Mode

Outdoor unit starts to operate quietly by activating this mode. The time of this mode can be set in conjunction with Indoor Silent Timer.

5. Home Leave Mode

Home leave mode maintains the room temperature at a moderate level.

6. Favourite Mode

Operation mode, set temperature, fan speed and air flow direction will automatically be adjusted to the programmed favourite setting.

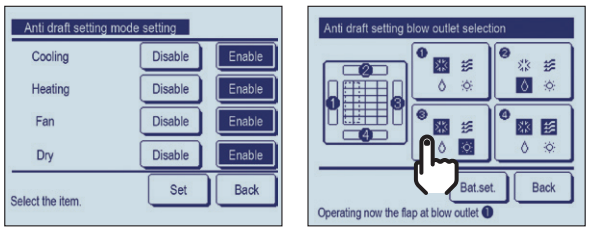
7. Filter Sign

Now

Announces the due time for cleaning the air filter.

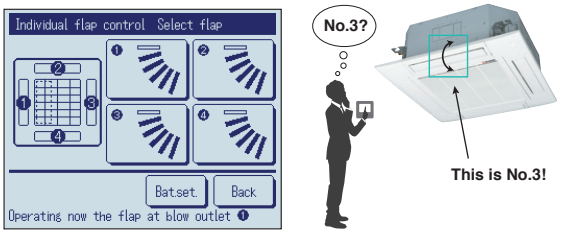
Draft Prevention Setting (only FDT•FDTC series)

User can enable/disable the motion of Draft prevention panel for each air outlet for each operation mode. This function can be set while operating.



Easy Adjustment of the Air Flow

User can visually confirm and set the direction of flaps using the visual display on the remote controller.



Motion Sensor Control

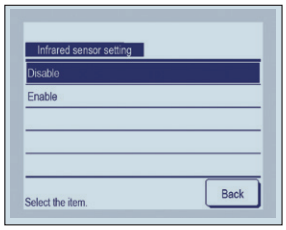
Presence of humans and activity are detected by a motion sensor to perform various controls.

1 Select Enable / Disable

Motion sensor control

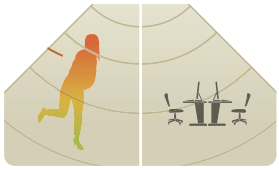
Enable/Disable

Select Enable / Disable for the motion sensor of the indoor unit connected to the R/C.

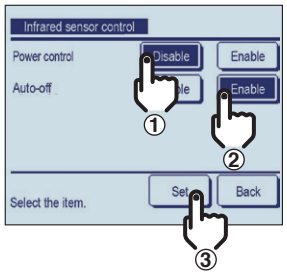


2 Select Enable / Disable per control

- **Power control**
- **Auto-off**



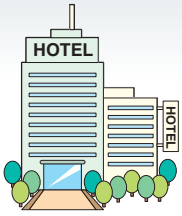
Enable/Disable



Additional Functions of External Input / Output

The external input/output of indoor unit by remote controller can set input/output based on user's demand.

Remote surveillance system



Card key on-off

External Input

Two of the following could be selected

CNT, CNTA

Input
- Run / Stop
- Permission/Prohibition
- Cooling/Heating
- Emergency Stop
- Set temp. shift
- Forced thermo-off
- IU operation stop
- Silent mode

External Output

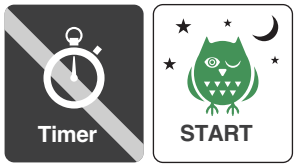
Four of the following could be selected

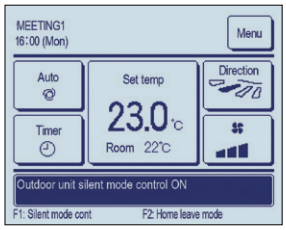
CNT

Output
- Operation
- Heating
- Compressor ON (thermo-ON)
- Inspection
- Cooling (defrosting)
- Fan operation
- Fan operation with Phi or Hi
- Fan operation with Me or Lo
- Defrosting (oil return in heating operation)
- Ventilation
- Heater ON
- Free cooling
- IU overload alarm

Silent Mode Control

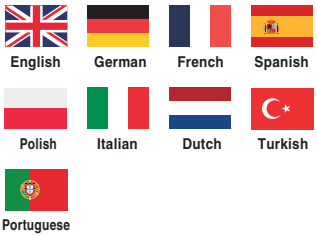
The Outdoor unit is controlled prioritising quiet operation. Silent mode control must be set to the F1 or F2 switch. User can start/stop the silent mode control with a single tap of a button.





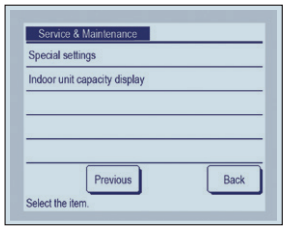
Language Switching

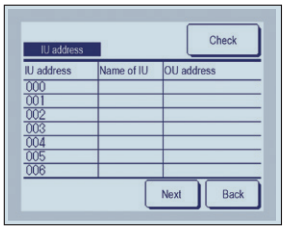
User can select from the following languages and also switch them on the top display.

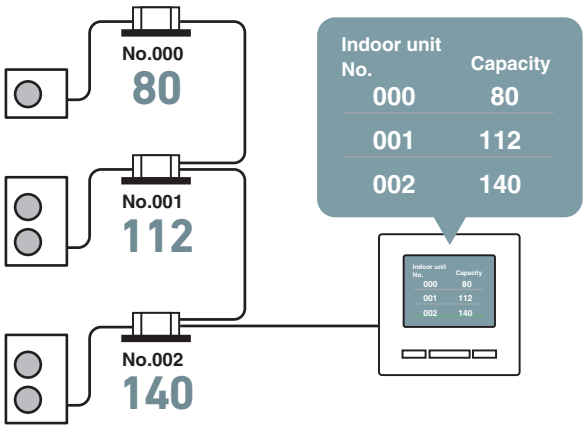


Indoor Unit Capacity Display

Capacities of Indoor units connected to the RC-EX3D are displayed.







Error display

"Error" If any error occurs on the air-conditioner, the "Unit protection stop" is indicated on the message display.

Outdoor units

Our new advanced technology has high efficiency, strong heating and long piping. This contributes to the environmental protection through energy saving and permits installation of the units (4–6HP) considering a heating operation under temperature conditions down to -20˚C. The Standard Inverter series offer optimised efficiency at a reasonable cost.

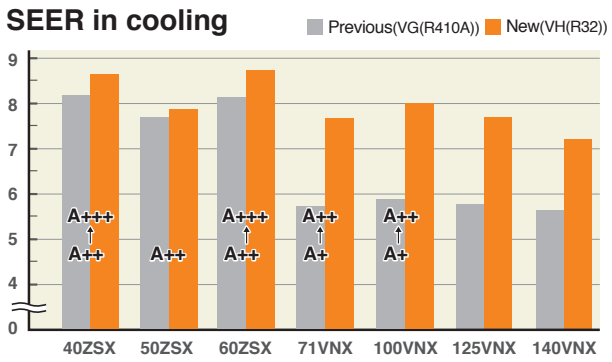
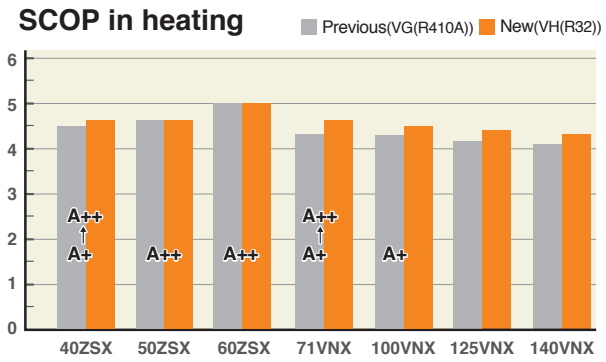
High Efficiency

Outdoor units high efficiency levels are achieved thanks to our latest technologies, such as high efficient twin rotary compressors.





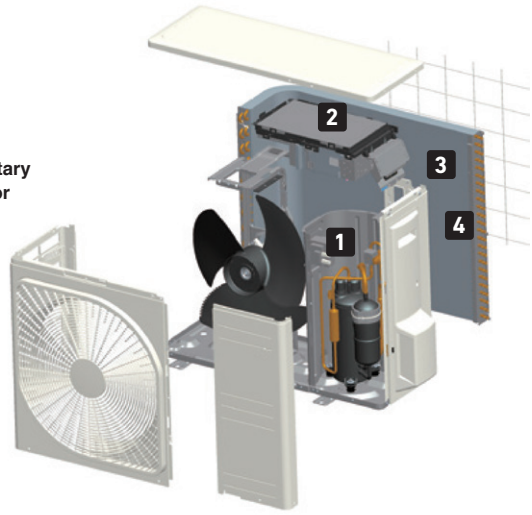
· In case of ceiling cassette 4way unit.

Our Latest Technologies

1 High efficiency performance on the DC twin rotary compressors

Adoption of DC twin rotary compressor has enabled to utilize a high-speed range of up to 120 rps at the maximum to secure the required capacity.

DC twin rotary compressor

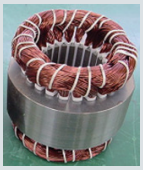


2 Vector inverter control

Optimum compressor control has been realized by employing the vector control* and the starting current has been improved significantly compared with former models. Moreover, vibration has been reduced.

* Vector control means a technique to realize an optimum control by converting the current wave to a smooth sinusoidal waveform

Better partial load efficiency



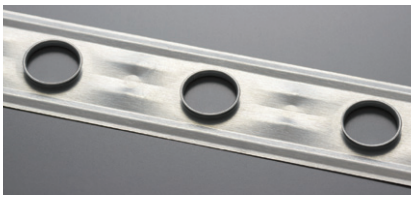
Distributed winding motor

Centralized winding motor

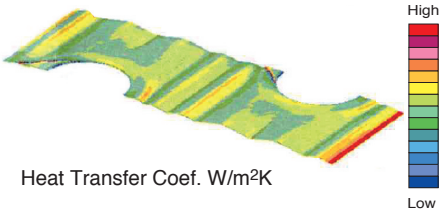
* only R32 models

3 Heat exchanger

Thanks to changing fin configuration from flat sheet to M shape fin. This high dimensional structure provides optimum balance of heat transfer and airflow.



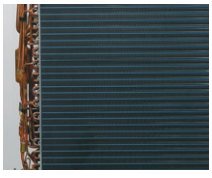
sectional structure



Heat Transfer Coef. W/m²K

4 Blue fin

Due to application of blue coated fins (KS101) on the heat exchanger of the new outdoor unit, corrosion resistance has been improved compared to previous models.



Blue Fin

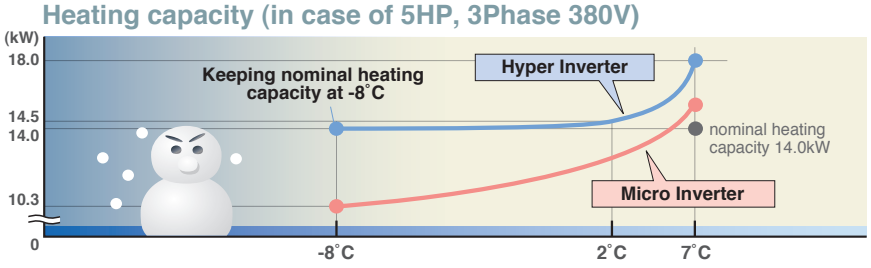
Hyper Inverter	3–6HP
Micro Inverter	4–12HP
Standard Inverter	3.5–5HP

Leading Powerful Heating Capacity

Hyper Inverter

The maximum heating capacity can be increased by:
- optimizing the refrigerant control and use of the electric expansion valve
- Utilization of the twin rotary compressors
- Nominal heating capacity can be reached when outdoor temperature is -8°C
- Also effective to be used in cold areas

Heating capacity (in case of 5HP, 3Phase 380V)

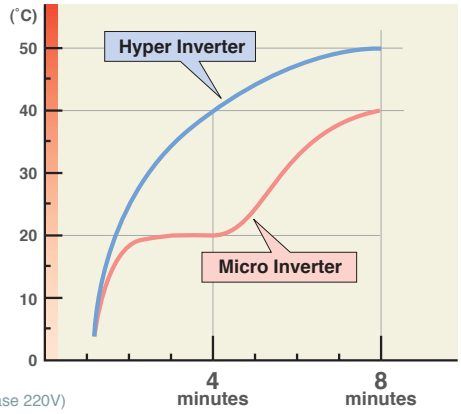


model name	nominal heating capacity (kW at outdoor temperature of 7˚C)	heating capacity at outdoor temperature of -8˚C
FDC100VSX(4HP, 3Phase 380V)	11.2kW	11.2kW
FDC125VSX(5HP, 3Phase 380V)	14.0kW	14.0kW
FDC140VSX(6HP, 3Phase 380V)	16.0kW	16.0kW

Please refer to our technical manual for installation conditions, operation range and heating/cooling capacities. (including 1Phase 220V)

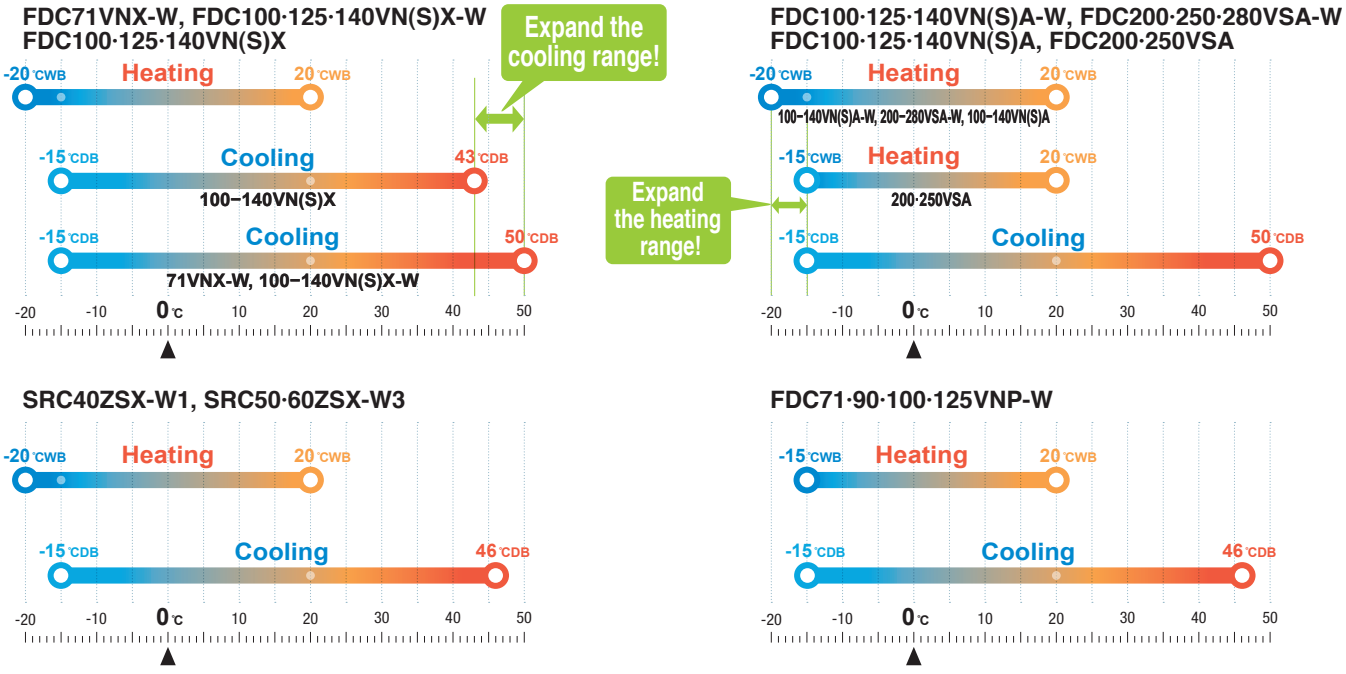
Temperature of supply air can reach 40˚C in 4 minutes after start up under low temperature operation conditions (at both indoor and outdoor temperature of 2˚C) and can reach 50˚C in 8 minutes after that.

Heating capacity



Wide Range of Operation

Our new advanced technology has expanded the heating and cooling operation range.This permits installation of the units under a low outdoor temperature conditions down to -15˚C/-20˚C In heating operation and -15˚C in cooling operation.

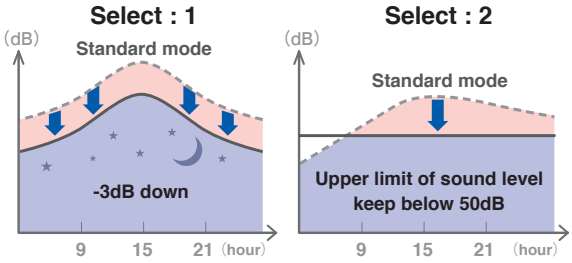


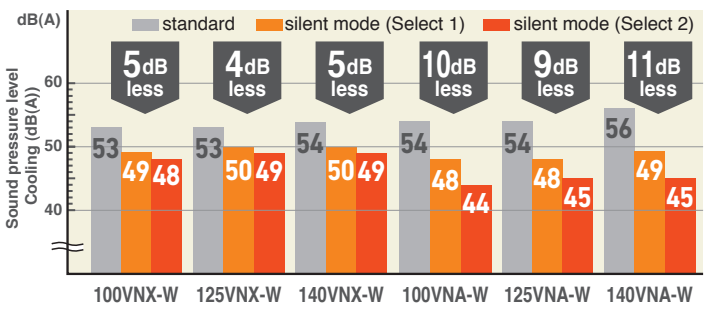
Silent Mode Operation

Hyper / Micro Inverter

Improved “silent mode” is possible, in two steps.

※ Applied on 4–6HP, 8–12HP(R32)

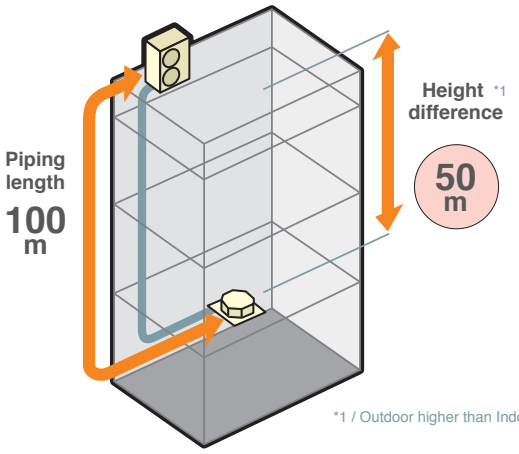




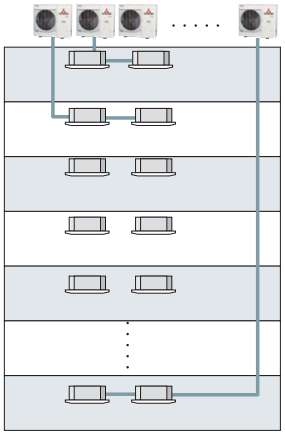
Installation Workability

Enhanced installation workability thanks to the extended pipe length – longest level in the industry and precharged refrigerant.

Long piping (in case of Hyper Inverter 4–6HP (R32))



Wider variation of installation!



Hyper Inverter

HP	Piping length	Height difference
1.5 – 2.5	30m	20m
3	50m	30m
4–6(R32)	100m	50m
4–6(R410A)	100m	30m

Micro Inverter

HP	Piping length	Height difference
4 – 6	50m	50m*2
8–10(R32)	70m	50m*3
8·10(R410A)	70m	30m
12	60m	50m*3

Standard Inverter

HP	Piping length	Height difference
3 ~ 5	30m	20m

Refrigerant precharged piping length extending to 30m

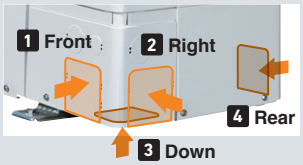
Refrigerant precharged piping length extends up to 30m*. This eliminates the need to add refrigerant on site, which sets it free from trouble of excessive or insufficient charging of refrigerant, and allows carrying out the installation smoothly. * Hyper inverter 1.5–2.5HP and Standard Inverter are up to 15m.

*2 When the outdoor unit is installed at a position higher than the indoor unit by 30m or more, set SW5-2 on the control PCB to ON.
*3 In case of following conditions:Max.50m(Outdoor unit is higher & Outdoor temperature ≦ 43°C), Max.30m(Outdoor unit is higher & Outdoor temperature > 43°C)

Serviceability

Micro Inverter (8(R32)·10·12HP)

Improved freedom of piping layout

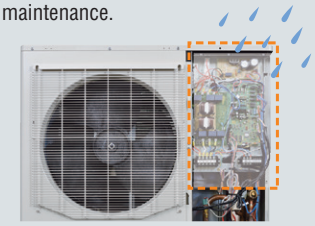


Hole size becomes 120% bigger.

Wire insertion holes for fall prevention

A transparent rain cover

Attached as a standard for easy maintenance.



2 Layer Construction

Thanks to control box structure with 2 layer construction using hinge connection, service and maintenance has been made much easier for inverter components.

Fixing screws to service panel

Decreasing number of screws from 5 to 2, installation & service speed is improved.

Base heater kit (Option)

This kit is recommended to be used in an area where the lowest temperature drops below 0˚C.

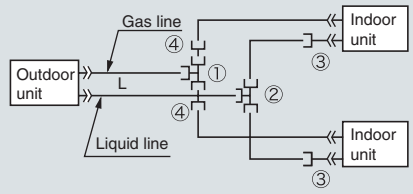
Choice of piping specification

Diagrams below show the application as samples. For further information, refer to TECHNICAL MANUAL.

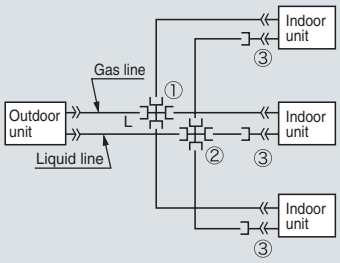
Twin type

Models FDC71, FDC100–140, FDC200, FDC250, FDC280
[Branch pipe set : DIS-WA1G, DIS-WB1G]



Triple type

Model FDC140, FDC200
[Branch pipe set : DIS-TA1G, DIS-TB1G]



The indoor - outdoor piping length differences among indoor units are less than 3m.

Chart of shapes of branch piping parts

Branching pipe set type	Outdoor unit	Indoor unit combinations	Symbol: Branching pipe set for a gas pipe	Symbol: Branching pipe set for a liquid pipe	Symbol: Different diameter pipe joint
DIS-WA1G (Two-way branching set)	FDC71	40+40	① ID15.88 — 1 piece — ID15.88 / ID15.88	② ID9.52 — 1 piece — ID9.52 / ID9.52	③ Joint A: ID9.52 — 2 pieces — Flare Joint (for indoor unit side connection); ④ Joint B: OD15.88 — 2 pieces — ID12.7
	FDC100	50+50			
		40+60			
	FDC125	60+60			
		50+71			
	FDC140	71+71			
		50+100

		71+125			
	FDC250 FDC280	125+125 140+140			
DIS-TA1G (Three-way branching set)	FDC140	50+50+50	① ID12.7 — 1 piece — ID15.88	② ID9.52 — 1 piece — ID9.52	③ Joint A: ID9.52 — 3 pieces — Flare Joint (for indoor unit side connection)
DIS-TB1G (Three-way branching set)	FDC200	71+71+71	① ID15.88 — 1 piece — ID25.4	② ID9.52 — 1 piece — ID9.52	③ Joint A: ID9.52 — 2 pieces — Flare joint(for indoor unit side connection); Joint B: OD15.88 — 1 piece — ID12.7; Joint D: ID12.7 — 1 piece — OD9.52

Symbol ① to ④ in the drawing shows the symbols of branch piping parts in the chart respectively.

Branch piping should always be arranged to have level or perpendicular position.

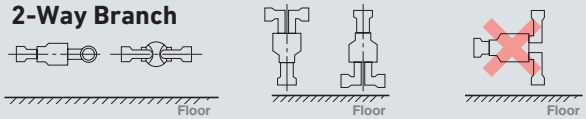
Notes

(1)When 40-60 models of indoor units are applied to this combination, the reducer③ supplied with the branch piping set should be used in order to reduce the liquid piping size from ø9.52mm to ø6.35mm at indoor unit side (flare connection). Accordingly be sure to select the liquid piping size ø9.52mm from branch to indoor unit.
(2)The reducer④ is for FDC71 and 100 models only.

ID stands for inner diameter and OD, outer diameter.

The branch piping (both gas and liquid lines) should always be arranged to have a level or perpendicular position.

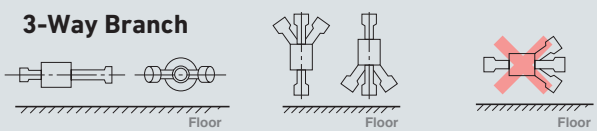
2-Way Branch



Mount —·— sections level with the floor.

Mount —·— sections perpendicular to the floor.

3-Way Branch



Indoor units

BENEFITS SUMMARY

			FDT	FDTC	FDU	FDUM	SRK	FDE	FDF
Energy-Saving		**Inverter Technology** Inverter control technology delivers high efficiency and a smooth operation from high speed to low speed. A smooth sine voltage wave is attained.	●	●	●	●	●	●	●
	ECO	**Energy-Saving Operation** * Since the capacity is controlled automatically based on the outdoor temperature, energy can be saved without losing comfort.	●	●	●	●	●	●	●
		Motion Sensor * This sensor detects human activity and shifts the temperature setting according to the amount of activity in the room.	● Option	● Option	● Option	● Option		● Option	● Option
		Home Leave Operation This function ensures that when the room is unoccupied for long periods of time, the unit will maintain a moderate indoor temperature, avoiding extremely hot or cool temperatures.	●	●	●	●	●	●	●
		Set Temperature Auto Return * This function allows the user to program a preferred set temperature that the unit will return to each time it is operated.	●	●	●	●	●	●	●
Comfort		**Automatic Operation** This function automatically selects the required heating or cooling function based on the current room conditions.	●	●	●	●	●	●	●
		Silent Operation This function allows the user to program periods where the unit will operate with reduced noise levels, perfect for night time and an uninterrupted sleep.	●	●	●	●	●	●	●
		Hi Power Operation Use the high power function to quickly reach your optimum temperature level when you first turn on the unit. This function will operate for a maximum of 15 minutes before returning to normal operation.	●	●	●	●	●	●	●
Air Flow		**Flap Control System** This function allows the user to set the upper and lower limit positions of the flap at each air outlet individually, providing you with complete control over interior air flow.	●	●			●	●	
		Auto Swing The louvers on your unit will move up and down continuously during operation. This function allows you to set the up/down swing position of the louver to the preferred operation angle.	●	●			●	●	●
		Draft Prevention Setting * Draft Prevention setting provides a comfortable air flow without any draft feeling. Whether cooling or heating a room, the remote control can be used to instantly suppress any warm or cool drafts. This accurately assists how air flow is directed out of the indoor unit.	● Option	● Option					
		Automatic Fan Speed The unit's on-board microcomputer continuously monitors the room's air temperature and adjusts the air flow automatically.	●	●	●	●	●	●	●

When using RC-EX3D (Remote control), functions with symbol ●●●●●● are available.
However, for RC-E5 (Remote control), functions with * are not available.

FDT	FDTC	FDU	FDUM	SRK	FDE	FDF
						
P22	P38	P46	P56	P70	P78	P92

			FDT	FDTC	FDU	FDUM	SRK	FDE	FDF
Timer		**Sleep Timer** This function allows the user to set a pre-determined amount of time between 30 and 240 minutes that your unit will operate for before switching off.	●	●	●	●	●	●	●
		Peak-Cut Timer * This function lets the user to preset the capacity limit during certain periods of the day, minimising energy consumption during peak billing times, thus reducing operation costs.	●	●	●	●	●	●	●
		Weekly Timer Set the unit to turn on and off automatically on a weekly basis to suit your usual room usage on each day.	●	●	●	●	●	●	●
Convenience		**Function Switch *** From the seven available functions on the unit, this function allows the user to set two functions to operate automatically.	●	●	●	●	●	●	●
		Favourite Setting * Operation mode, set temperature, fan speed and air flow direction automatically adjust to the programmed favourite setting.	●	●	●	●	●	●	●
		Select the Language * Set the language to be displayed on the remote control.	●	●	●	●	●	●	●
		Air Filter The air filter in the unit traps and removes airborne dust particles and other allergens to provide you clean air.	●	●	Procure locally	● Option	●	●	●
		Filter Sign This warning alerts when the filter needs to be cleaned.	●	●	●	●	●	●	●
		Outside Air Intake This function provides clean fresh air into the room through the external air intake, avoiding the constant recycling of internal air.	●	●	●	●			
Others		**Self Diagnostics** The internal microcomputer automatically runs a diagnostic of the system in the event of a malfunction. This enables authorised dealers to isolate and repair any issues.	●	●	●	●	●	●	●
		Built in Drain Pump The built-in drain pump, allows greater flexibility with installation, offering a great solution for applications with limited space.	●	●	● *1	●			
		Improved Serviceability The fan unit (comprised of impeller and motor) is easily accessible from either the side or bottom of the unit and can be slid out for easy maintenance.			●	●

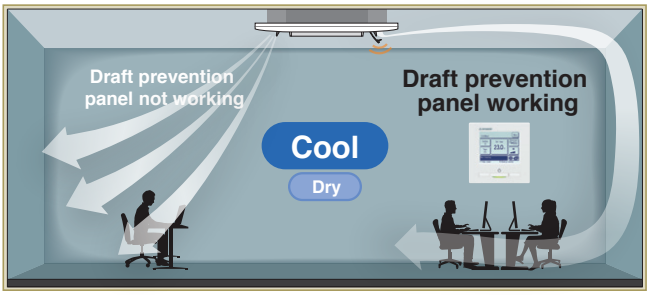
Wireless

RCN-T-5BW-E2(White)
RCN-T-5BB-E2(Black)

*Not all functions available with all remote control options.

Draft Prevention Panel (Option)

This prevents cold/hot draft being blown directly on the user.It is possible to set Draft Prevention Panel for each air outlet.

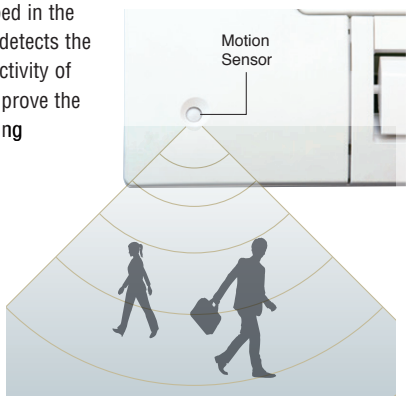


User can position panels by using the remote controller only (RC-EX3D, Wireless kit) when Draft Prevention Panel is available.

Motion Sensor (Option)

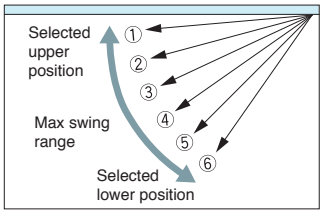
Motion sensor is equipped in the corner of the panel and detects the presence/absence and activity of humans in a room to improve the comfort and energy saving performance of the unit.

LB-T-5BW-E(White)
LB-T-5BB-E(Black)



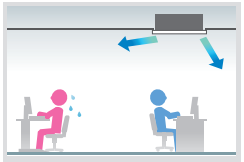
Individual Flap Control System

According to room conditions, four directions of air flow can be controlled individually by utilizing the flap control system. Individual flap control is available even after installation.

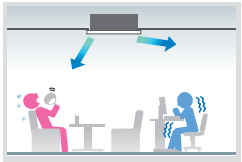


Flap can swing within an upper and lower flap range position within can be selected with a wired remote control.

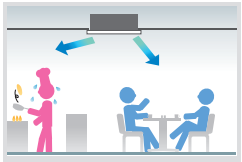
* The wireless remote control is not applicable to the Individual flap control system.



For person who is far from the indoor unit



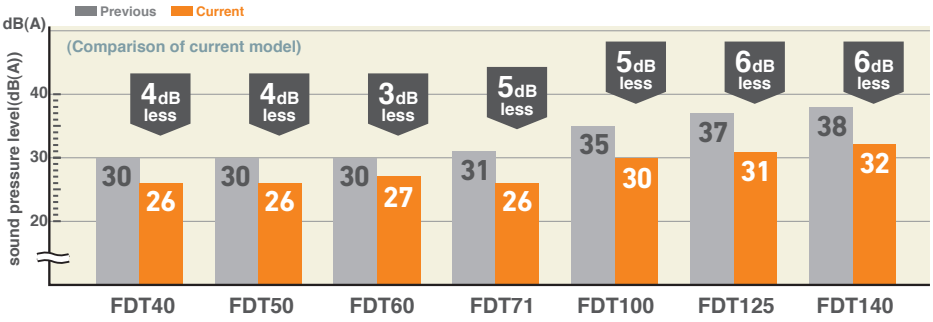
For both persons who are feeling hot or cold



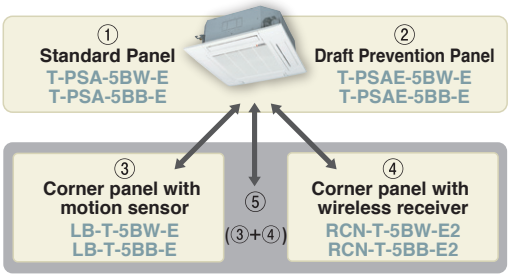
Can cool both the kitchen and the guests

Reduced Noise

New technology has achieved low noise (in cooling) while keeping capacity and comfort.



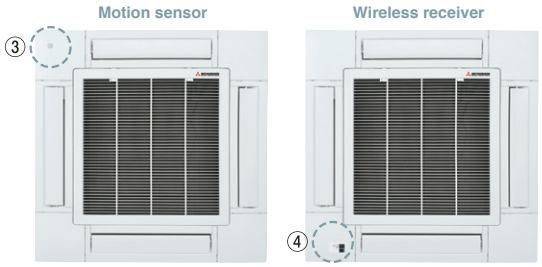
Panel Select Pattern (Option)



8 patterns of panel are available.

①	Standard Panel only
①+③	Standard Panel with corner panel with motion sensor
①+④	Standard Panel with corner panel with wireless receiver
①+⑤	Standard Panel with corner panel with motion sensor & corner panel with wireless receiver
②	Draft Prevention Panel only
②+③	Draft Prevention Panel with corner panel with motion sensor
②+④	Draft Prevention Panel with corner panel with wireless receiver
②+⑤	Draft Prevention Panel with corner panel with motion sensor & corner panel with wireless receiver

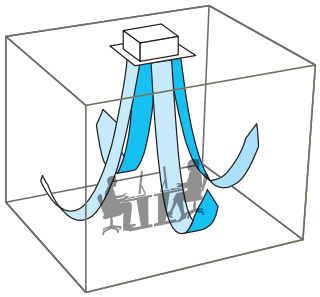
Installation position of Wireless kit and Motion sensor kit



*Wireless receiver and Motion sensor can be installed to the position as shown

Suitable for High ceilings

The Powerful blowout carries comfortable air flow to the floor even in high ceiling applications. It is ideal for high ceiling offices, stores, etc., with a wide, uniform air flow throughout the room.



850mm Drain Pump

Drain can be discharged upward by 850mm from the ceiling surface close to the indoor unit.
It allows a piping layout with a high degree of freedom depending on the installation location.

Easy and quick installation and maintenance

Serviceability & Workability

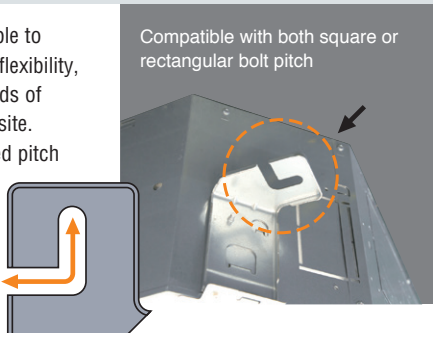
Quick positioning !

Indoor unit is easily positioned and installed

1 Adjustable easier positioning of unit by new slits.

FDT

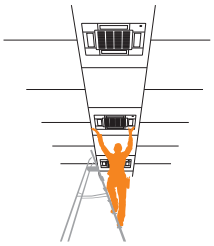
New shape of slit is suitable to install the unit with more flexibility, compatible with many kinds of suspending bolt pitch on site.
Any rectangular or squared pitch of suspending bolts are available with this slit.

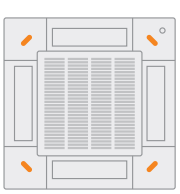


2 New slit in panel allows easier installation on site.

FDT
FDTC

Flexible positioning is available, which helps adjusting the direction of panel accordingly to lines or pattern on the ceiling.





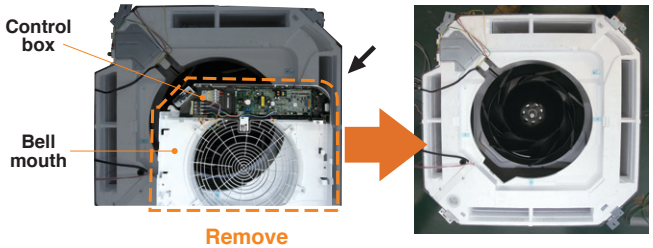
4 long slits are available.

Quick installation and maintenance

1 Easy access to component part for easy maintenance.

FDT

1. The control box and bell mouth can be removed together.
2. Easy access to impeller and fan motor.

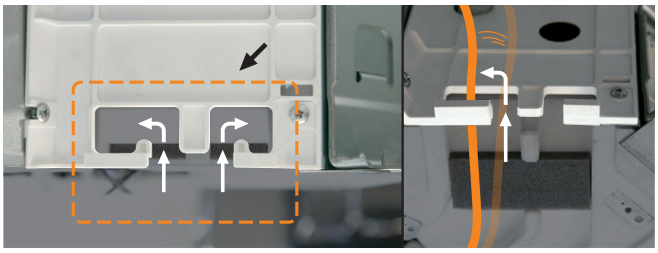


Remove

2 New shape of path of wiring.

FDT

New shape of path gives easy wiring work for installation.

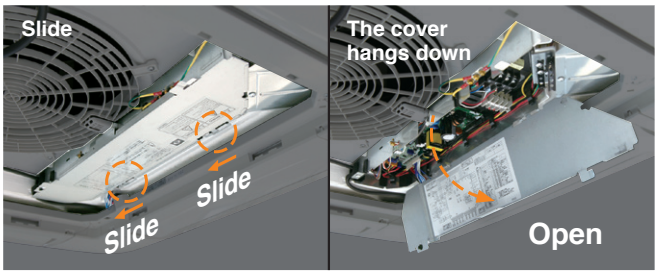


Easy wiring work

3 No need to remove screws to open the controller cover.

FDT

It is possible to loose and slide open the cover without removing the screws. This prevents the cover from falling and causing damage on site.

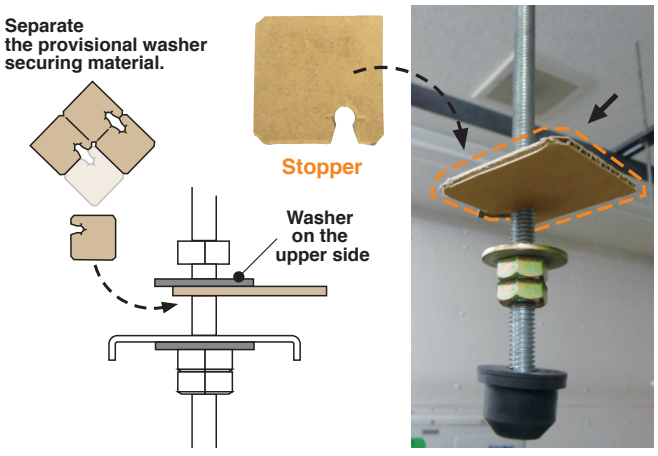


No need to remove screws

4 Safer installation by stopper of washer

FDT
FDTC

When unit is installed with hook between washers, this stopper helps to install the unit safely, without adjusting washer.



Builder

Maintenance

For smooth and easy working

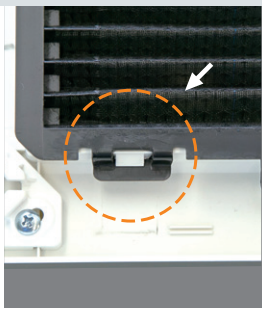
Good help for installation and maintenance

1 Easy and flexible hook to remove the filter

FDT FDTC

Hook of soft material helps to remove the filter without dust spreading.

Press the filter tab to the outside and remove the filter.

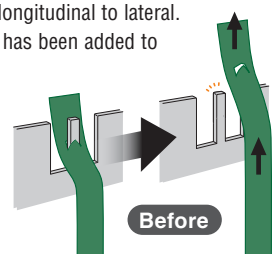


Soft material

2 Securely fix the corner lid by strap

FDT

The direction of the strap hook part has been changed from longitudinal to lateral. Furthermore, a barb has been added to the hook pin to prevent the strap from coming off.

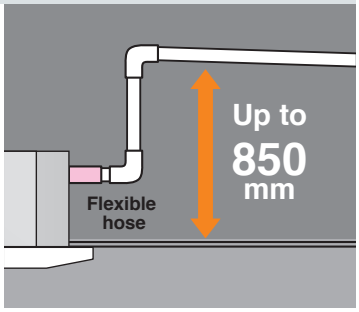


3 Drain-up-lift increases up to 850 mm

FDT FDTC

The drain can be lifted up to 850 mm from the ceiling surface.

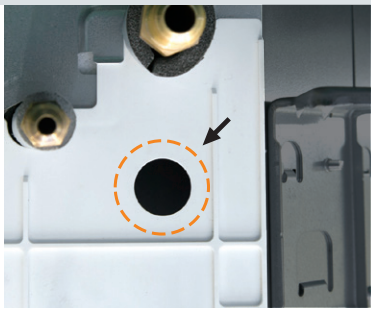
	Previous	New
FDT	700	850
FDTC	600	850



4 New port to check drain water flow

FDT

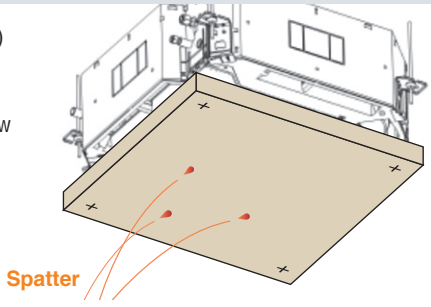
A water supply port has been provided in the piping lid for easier testing of the drain water flow.
(The port is usually sealed with a rubber cap.)



5 Re-use of packages during construction work

FDT FDTC

Package material (carton) helps to protect the unit from unexpected welding spatter or dust on the new unit.

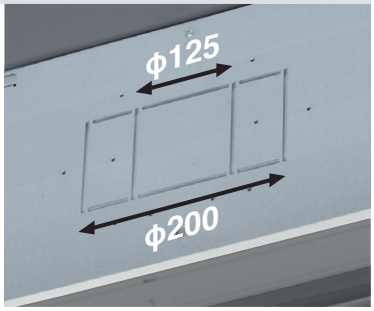


6 More flexible outlet for ducting

FDT FDTC

Both ϕ125 and ϕ200 (oval shaped) are available.

ϕ125 ϕ200

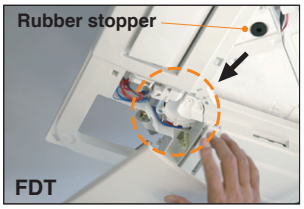


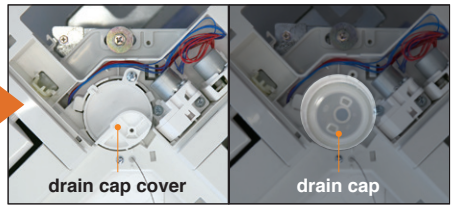
7 Easy check of drain pan

FDT FDTC

Easy inspection of the condition of the drain pan is possible by removing only the corner lid.

Remove corner lid. Remove drain cap cover and check the condition. It is necessary to clean-up, firstly remove the rubber stopper to drain water out and secondly remove the drain cap.





Clean up the area around the drain pump port.

NOTES:

The data are measured under the following conditions(ISO-T1, -H1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

NOTES:

The data are measured under the following conditions(R32:ISO-T1,-H1 / R410A:ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
*3 : The values are for one indoor unit operation. (Multi system only)

The values are for simultaneous Multi operation.

NOTES:

The data are measured under the following conditions(ISO-T1, -H1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
*3 : The values are for one indoor unit operation. (Multi system only)

The values are for simultaneous Multi operation.

NOTES:

The data are measured under the following conditions(R32 : ISO-T1, -H1 /, R410A:ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
*3 : The values are for one indoor unit operation. (Multi system only)
*4 : In case of following conditions:Max.50m(Outdoor unit is higher & Outdoor temperature ≦ 43°C), Max.30m(Outdoor unit is higher & Outdoor temperature > 43°C)

NOTES:

The data are measured under the following conditions(R32:ISO-T1,-H1 / R410A:ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
*3 : The values are for one indoor unit operation. (Multi system only)

The values are for simultaneous Multi operation.

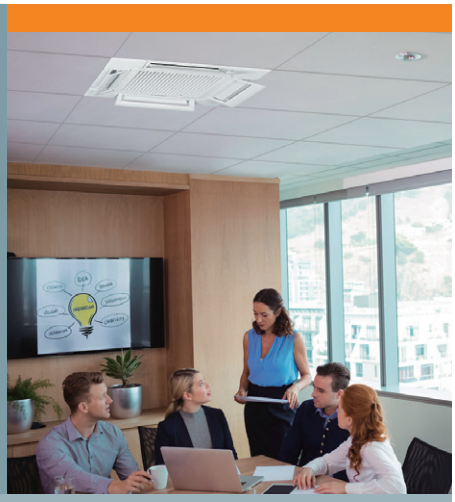
Intdoor Unit

Ceiling Cassette -4way Compact

FDTC 40/50/60

Draft Prevention Panel (Option)



Energy Saving | Home Leave | Hi Power | Silent Operation | Flap Control | Favourite Setting

R410A R32 Hybrid

Remote control (Option)

Wired

RC-EX3D

RC-E5

New!

RC-ES1

RCH-E3

Wireless

RCN-TC-5AW-E3

*Not all functions available with all remote control options.

European Design & Flat Panel

Unique Grille Design

A grille designed with a unique structure and a clean white panel that blends with the room.

Honeycomb type

Grid type

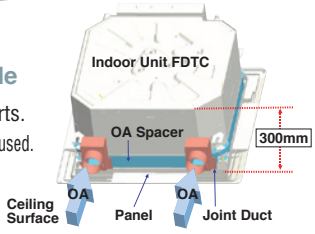
Integrated ceiling system design (600×600)

The weight is 14kg
Height of thin panel and main body is 248mm allowing adequate spacing for installation.

Taking OA (Outside Air) into inside

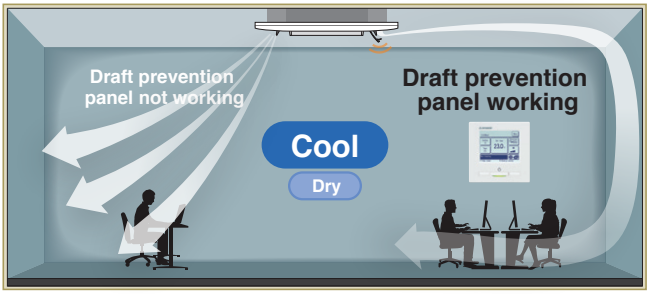
Fresh air can be taken in without optional parts.
When the fresh air is insufficient, optional parts can be used.

OA Spacer TC-OAS-E2(Option)
Joint Duct TC-OAD-E(Option)



Draft Prevention Panel (Option)

This prevents cold/hot draft being blown directly on the user. It is possible to set Draft Prevention Panel for each air outlet.

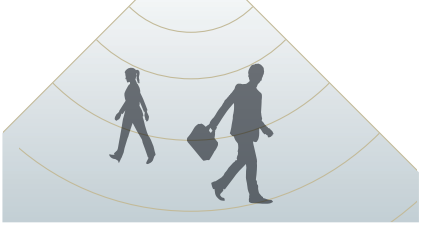


User can position panels by using the remote controller only (RC-EX3D, Wireless kit) when Draft Prevention Panel is available.

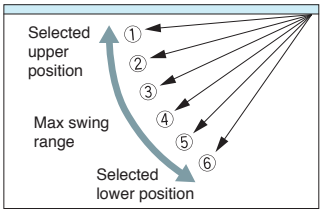
Motion Sensor (Option)

Motion sensor is equipped in the corner of the panel and detects the presence/absence and activity of humans in a room to improve the comfort and energy saving performance of the unit.

LB-TC-5W-E



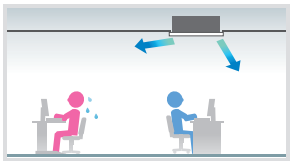
Individual Flap Control System



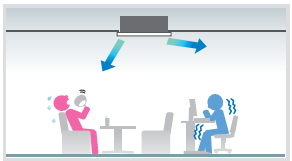
According to room temperature conditions, four directions of air flow can be controlled individually by following Flap control system. Individual flap control is available even after installation.

The flap can swing within the range of upper and lower flap position selected with wired remote control.

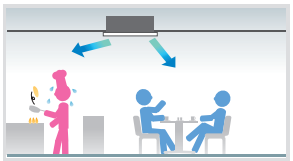
* The wireless remote control is not applicable to the Individual flap control system.



For person who is far from the indoor unit



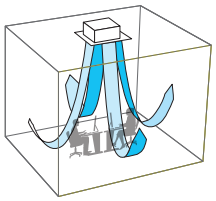
For both persons who are feeling hot or cold



Can cool both the kitchen and the guests

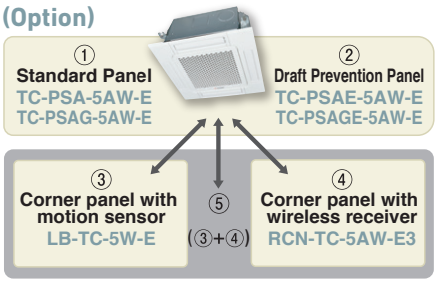
Suitable for High ceilings

The Powerful blowout carries comfortable air flow to the floor even in high ceiling applications. It is ideal for high ceiling offices, stores, etc., with a wide, uniform air flow throughout the room.



Panel Select Pattern

(Option)



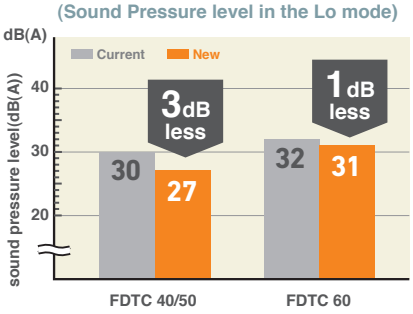
8 patterns of panel are available.

①	Standard Panel only
①+③	Standard Panel with corner panel with motion sensor
①+④	Standard Panel with corner panel with wireless receiver
①+⑤	Standard Panel with corner panel with motion sensor & corner panel with wireless receiver
②	Draft Prevention Panel only
②+③	Draft Prevention Panel with corner panel with motion sensor
②+④	Draft Prevention Panel with corner panel with wireless receiver
②+⑤	Draft Prevention Panel with corner panel with motion sensor & corner panel with wireless receiver

Quieter Operation

Adopting new turbo fan and improving new heat exchanger enables noise reduction.

(Sound Pressure level in the Lo mode)



850mm Drain Pump

Drain can be discharged upward by 850mm from the ceiling surface close to the indoor unit.
It allows a piping layout with a high degree of freedom depending on the installation location.

NOTES:

The data are measured under the following conditions(ISO-T1, -H1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
*3 : The values are for one indoor unit operation. (Multi system only)

NOTES:

The data are measured under the following conditions(R32 : ISO-T1, -H1 / R410A : ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
*3 : The values are for one indoor unit operation. (Multi system only)
*4 : In case of following conditions:Max.50m(Outdoor unit is higher & Outdoor temperature ≦ 43°C), Max.30m(Outdoor unit is higher & Outdoor temperature > 43°C)

The values are for simultaneous Multi operation.

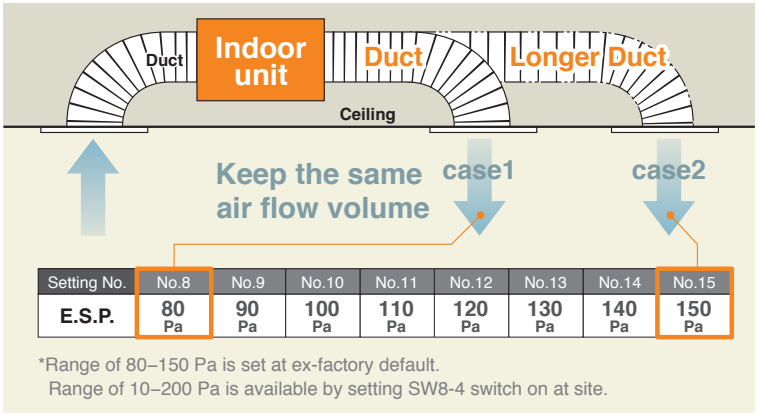
*Not all functions available with all remote control options.

External Static Pressure (E.S.P.) Control

The External Static Pressure (E.S.P.) can be manually set on the wired remote controller. Indoor unit will control the fan speed to keep rated air flow volume at each fan speed setting. You can set required E.S.P. by wired remote controller, calculated with the set air flow rate and the pressure loss of the duct.



Setting No.	No.8	No.9	No.10	No.11	No.12	No.13	No.14	No.15
E.S.P.	80 Pa	90 Pa	100 Pa	110 Pa	120 Pa	130 Pa	140 Pa	150 Pa

*Range of 80–150 Pa is set at ex-factory default.
Range of 10–200 Pa is available by setting SW8-4 switch on at site.

Range of external static pressure

10–200Pa

RC-E5

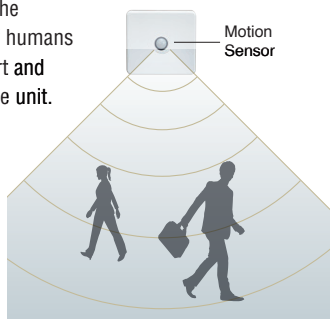
E.S.P. button

External Static Pressure (E.S.P.) can be set by E.S.P. button.

Motion Sensor (Option)

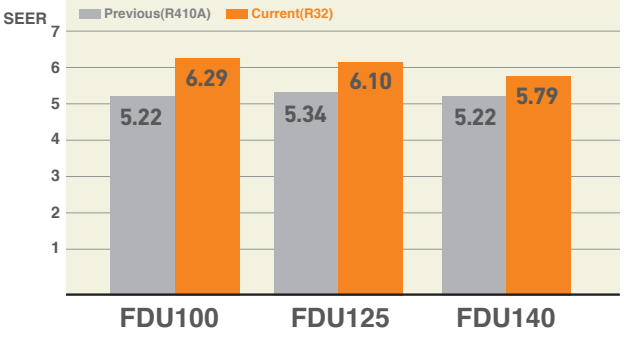
Motion sensor is equipped in the ceiling plane or wall plane and detects the presence/absence and activity of humans in a room to improve the comfort and energy saving performance of the unit.

LB-KIT2



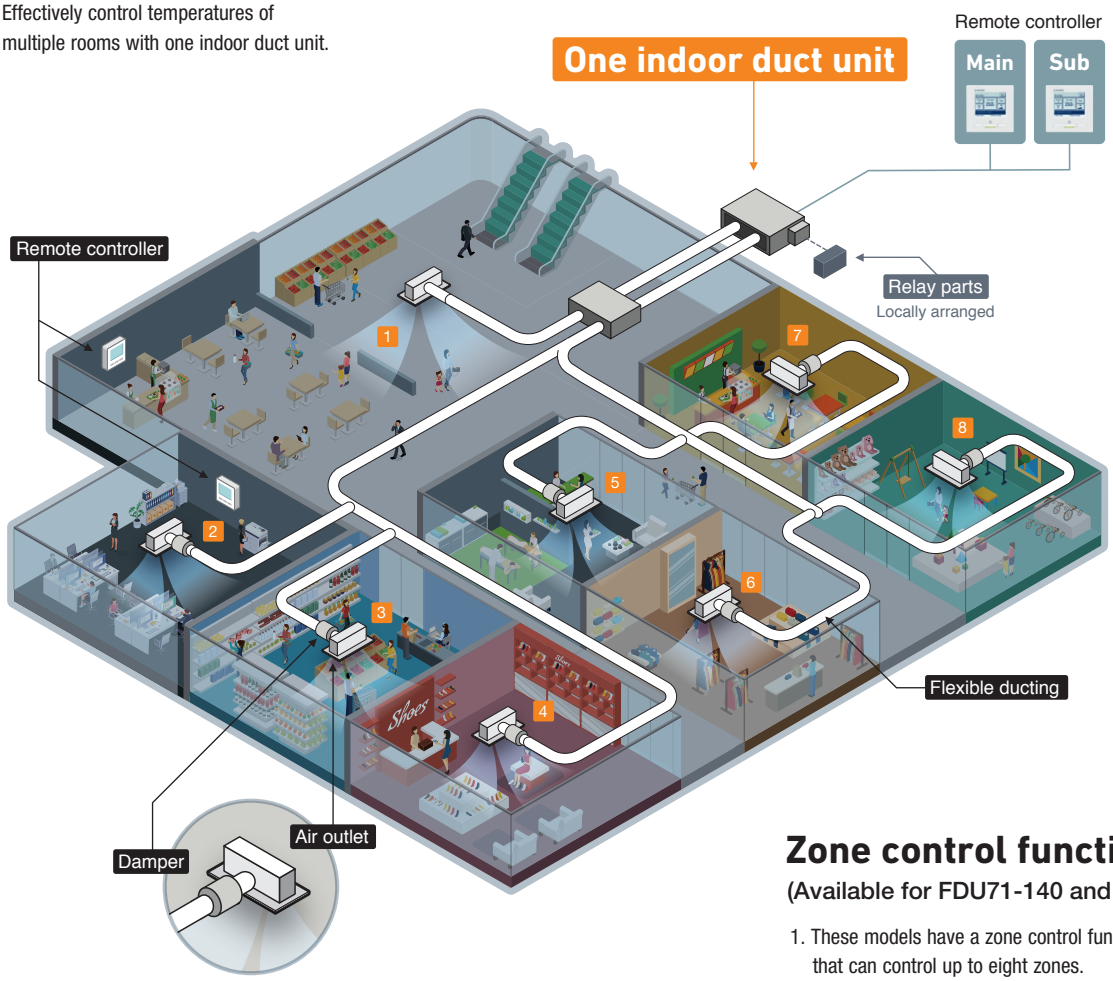
High Efficiency

Energy efficiency is improved by use of DC fan motor & high efficient heat exchanger.



Zoning system (Max 8 zones)

Effectively control temperatures of multiple rooms with one indoor duct unit.



RC-EXZ3D

Top display

Zone menu

Zone control function

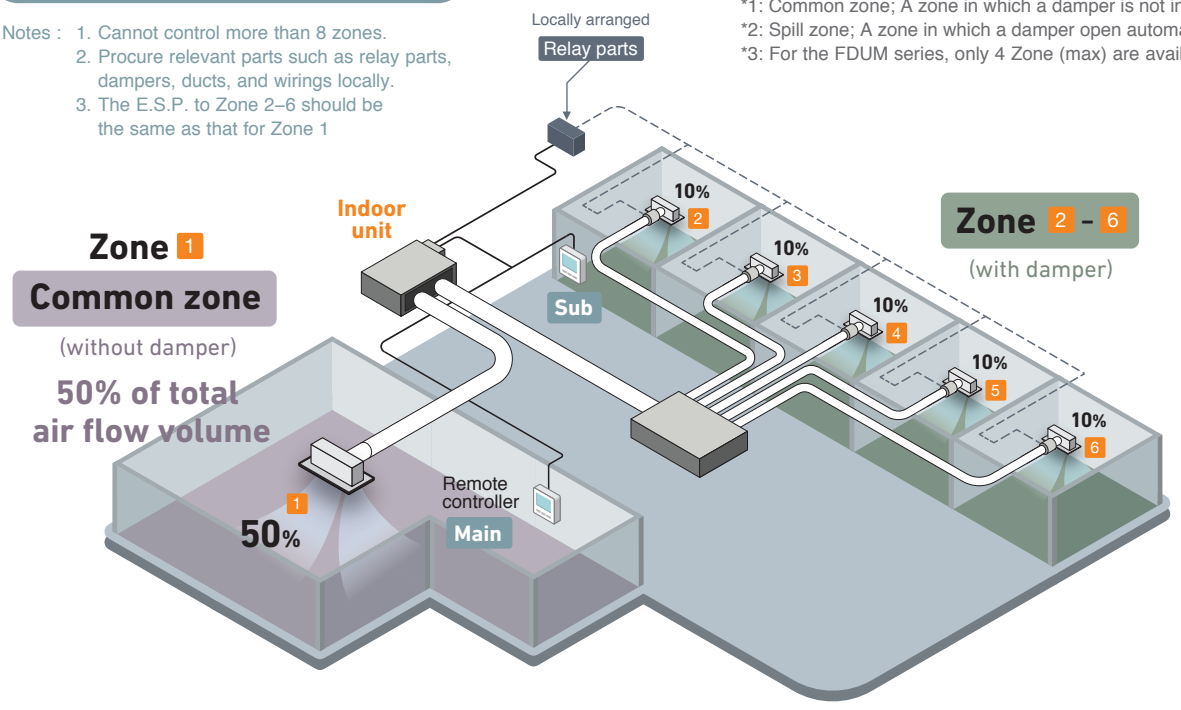
(Available for FDU71-140 and FDUM40-60(*3))

1. These models have a zone control function that can control up to eight zones.
2. The damper of each zone can be opened or closed with the exclusive remote control (RC-EXZ3D).
3. Timer function to open/close the damper is also available.
4. The duct system should be designed so that air flow volume of common zone(*1) or spill zone(*2) is 50% of total air flow volume.

*1: Common zone; A zone in which a damper is not installed.
*2: Spill zone; A zone in which a damper open automatically.
*3: For the FDUM series, only 4 Zone (max) are available.

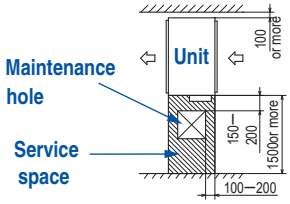
Example of 6 zones

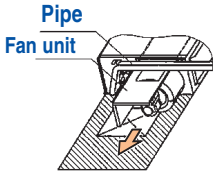
Notes : 1. Cannot control more than 8 zones.
2. Procure relevant parts such as relay parts, dampers, ducts, and wirings locally.
3. The E.S.P. to Zone 2–6 should be the same as that for Zone 1



Improvement of the Serviceability

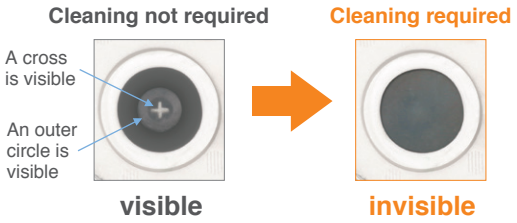
Fan unit (impeller and motor) can be pulled out from the right side of the unit.
Maintenance can be carried out from the right side or the bottom side of the unit.





Transparent Inspection Window

Dirt condition of the bottom of a drain pan can be checked through this transparent inspection window without removing drain pan.



Enhanced Installation Workability

600mm Drain Pump is mounted in FDU71/100/125/140.
The indoor unit is completely hidden in the ceiling, so this is suitable for spaces with classy interior decoration.

NOTES:

The data are measured under the following conditions(R32:ISO-T1, -H1 / R410A:ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : External static pressure is changeable to be set by the remote control. MAX external static pressure is ''High static pressure'' setting. The values of sound pressure level become 5dB(A) higher at external static pressure of 200Pa.
*3 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

NOTES:

The data are measured under the following conditions(R32 : ISO-T1, -H1 /, R410A : ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : External static pressure is changeable to be set by the remote control. MAX external static pressure is ''High static pressure'' setting. The values of sound pressure level become 5dB(A) higher at external static pressure of 200Pa.
*3 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

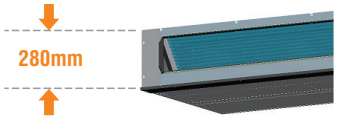
Thin Design

The height of all FDUM models is only 280mm.

FDUM100/125/140

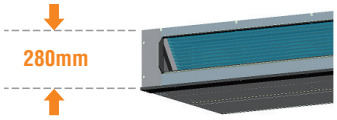
70mm less



H 350mm | H 280mm

FDUM40/50/60/71

19mm less

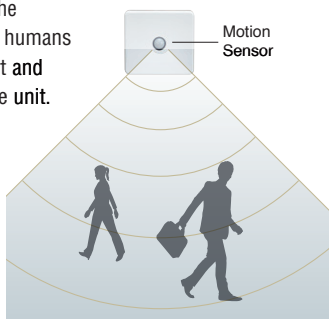


H 299mm | H 280mm

Motion Sensor (Option)

Motion sensor is equipped in the ceiling plane or wall plane and detects the presence/absence and activity of humans in a room to improve the comfort and energy saving performance of the unit.

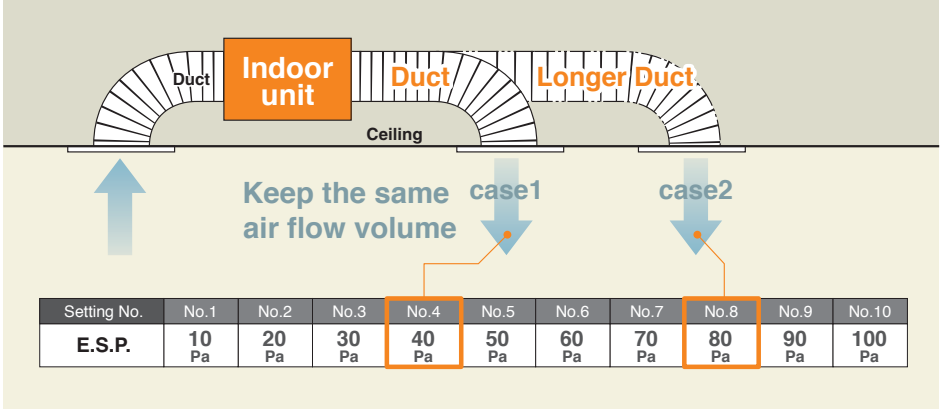
LB-KIT2



Automatic External Static Pressure (E.S.P.) Control

Duct design was simplified.
Using DC motor, the most optimum air flow volume can be achieved by this automatic control.
Indoor unit will recognize external static pressure by itself automatically and keep rated air flow volume.

RC-E5
E.S.P. button
External Static Pressure (E.S.P.) can be set by E.S.P. button.



Setting No.	No.1	No.2	No.3	No.4	No.5	No.6	No.7	No.8	No.9	No.10
E.S.P.	10 Pa	20 Pa	30 Pa	40 Pa	50 Pa	60 Pa	70 Pa	80 Pa	90 Pa	100 Pa

Zoning system

Effectively control temperatures of multiple rooms with one indoor duct unit. (Please refer to P47)

Improvement of the Serviceability

Fan unit (impeller and motor) can be pulled out from the right side of the unit. Maintenance can be carried out from the right side or the bottom side of the unit.

Transparent Inspection Window

Dirt condition of the bottom of a drain pan can be checked through this transparent inspection window without removing drain pan. (Please refer to P48)

Enhanced Installation Workability

600mm Drain Pump is mounted in all models.
The indoor unit is completely hidden in the ceiling, so this is suitable for spaces with classy interior decoration.

Ref.piping size	Liquid/Gas		ømm	9.52(3/8") / 15.88(5/8")			
Refrigerant line (one way) length			m	Max.50	Max.100		
Vertical height differences		Outdoor is higher/lower	m	Max.30 / Max.15	Max.50 / Max.15		
Outdoor operating temperature range		Cooling	°CDB	-15 to 50*3			
		Heating	°CWB	-20 to 20			
Air filter (option)				Filter kit : UM-FL2EF	Filter kit : UM-FL3EF		
Remote control (option)				Wired:RC-EX3D, RC-E5, RC-ES1, RCH-E3 Wireless:RCN-KIT4-E2			

NOTES:

The data are measured under the following conditions(ISO-T1, -H1).
Cooling:Indoor temp. of 27˚CDB, 19˚CWB, and outdoor temp. of 35˚CDB. Heating:Indoor temp. of 20˚CDB, and outdoor temp. of 7˚CDB, 6˚CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : External static pressure is changeable to be set by the remote control. MAX external static pressure is "High static pressure" setting. The values of sound pressure level become 5dB(A) higher at external static pressure of 100Pa.
*3 : If a cooling operation is conducted when the outdoor air temperature is –5˚C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

NOTES:

The data are measured under the following conditions(ISO-T1, -H1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.

*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.

*2 : External static pressure is changeable to be set by the remote control. MAX external static pressure is "High static pressure" setting. The values of sound pressure level become 5dB(A) higher at external static pressure of 100Pa.

*3 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

*4 : The values are for one indoor unit operation. (Multi system only)

The values are for simultaneous Multi operation.

Air flow	Indoor	Cooling (P-Hi/Hi/Me/Lo)	m^3/min	36 / 28 / 25 / 19	39 / 32 / 26 / 20	48 / 35 / 28 / 22
		Heating (P-Hi/Hi/Me/Lo)		36 / 28 / 25 / 19	39 / 32 / 26 / 20	48 / 35 / 28 / 22
	Outdoor	Cooling/Heating		75 / 73	75 / 73	75 / 73
External static pressure*2			Pa	Standard:60 Max:100		
Exterior dimensions	Indoor	HeightxWidthxDepth	mm	280 x 1370 x 740		
	Outdoor			845 x 970 x 370		
Net weight	Indoor		kg	54		
	Outdoor			80		
Ref.piping size	Liquid/Gas		ømm	9.52(3/8") / 15.88(5/8")		
Refrigerant line (one way) length			m	Max.50		
Vertical height differences		Outdoor is higher/lower	m	Max.50 / Max.15		
Outdoor operating temperature range		Cooling	°CDB	-15 to 50*3		
		Heating	°CWB	-20 to 20		
Air filter (option)				Filter kit : UM-FL3EF		
Remote control (option)				Wired:RC-EX3D, RC-E5, RC-ES1, RCH-E3 Wireless:RCN-KIT4-E2		

NOTES:

The data are measured under the following conditions(R32 : ISO-T1, -H1 / R410A : ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.

*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.

*2 : External static pressure is changeable to be set by the remote control. MAX external static pressure is "High static pressure" setting. The values of sound pressure level become 5dB(A) higher at external static pressure of 100Pa.

*3 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

*4 : The values are for one indoor unit operation. (Multi system only)

*5 : In case of following conditions:Max.50m(Outdoor unit is higher & Outdoor temperature ≦ 43°C), Max.30m(Outdoor unit is higher & Outdoor temperature > 43°C)

*Not all functions available with all remote control options.

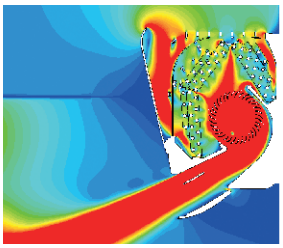
Elegant Timeless Design

The SRK series air-conditioners have been innovatively designed with rounded contours that fit beautifully into any of Europe's diverse interior settings.
The design was created by the Italian industrial design studio Tensa srl, based in Milan, to respond to a broad spectrum of requirements.(SRK50•60)

Jet Air Technology

We used the same aerodynamic analysis technology as used in developing jet engines.

CFD (computational fluid dynamics), commonly used for precision jet engine blade design, has now transformed airconditioning.
Our cutting-edge indoor air distribution system ensures very quiet operation and unparalleled energy efficiency across diverse indoor spaces.



Fast ⟷ Slow

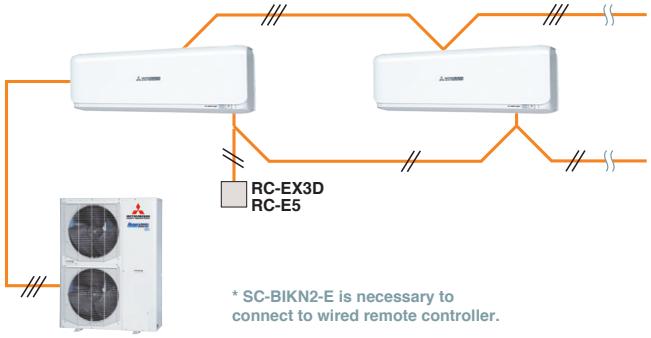
Colours in the figure show the air speed

Long Reach Air Flow

Long reach airflow is achieved by Jet technology.
Good for large living rooms and shops, which increases comfort.

Indoor Unit Connection

Up to three indoor units are connectable to one outdoor unit.

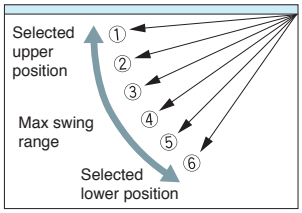


* SC-BIKN2-E is necessary to connect to wired remote controller.

Flap Control System

The flap can swing within the range of upper and lower flap position selected.

* The wireless remote control is not applicable to the flap control system.



SC-BIKN2-E connection (Option)

Interface kit can be built into indoor unit.(SRK50·60)

* SC-BIKN2-E cannot be used simultaneously with the Wireless LAN control system

		Heating	°CWB	-20 to 20		
Air filter, Q'ty				Polypropylene net x 2(Washable)		
Remote control (option)				Wired:RC-EX3D, RC-E5, RC-ES1, RCH-E3 & Interface kit:SC-BIKN2-E		

NOTES:

The data are measured under the following conditions (R32 : ISO-T1, -H1 / R410A : ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
*3 : The values are for one indoor unit operation. (Multi system only)

The values are for simultaneous Multi operation.

NOTES:

The data are measured under the following conditions (R32 : ISO-T1, -H1 / R410A : ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
*3 : The values are for one indoor unit operation. (Multi system only)
*4 : In case of following conditions:Max.50m(Outdoor unit is higher & Outdoor temperature ≦ 43°C), Max.30m(Outdoor unit is higher & Outdoor temperature > 43°C)

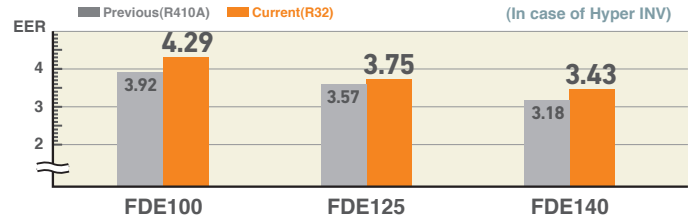
*Not all functions available with all remote control options.

High Efficiency

Energy efficiency was improved by use of DC fan motor & high efficient heat exchanger.



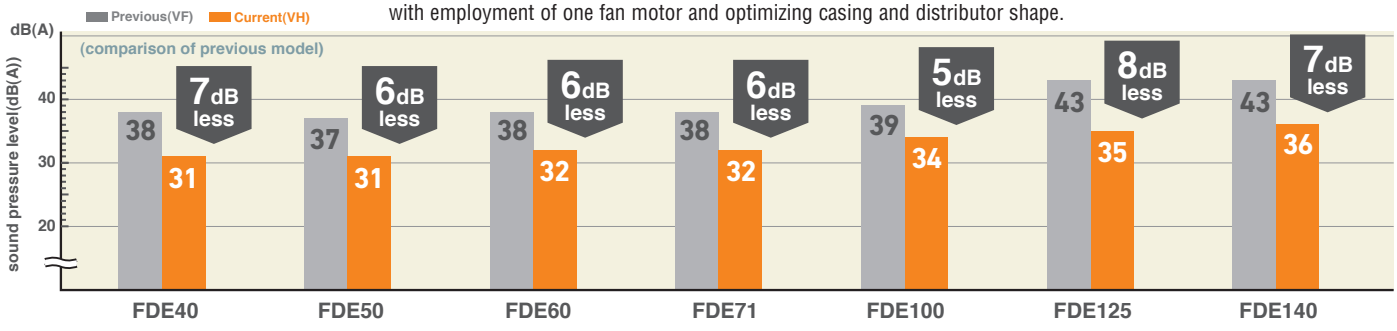
Lighter than ever

By decreasing the numbers of fan motors from two to one, we reduced the overall weight of our FDE units.

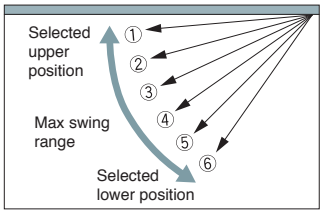
	Previous(VF)	Current(VH)	
60·71VH	37	33	4kg less!!
100·125·140VH	49	43	6kg less!!

Reduced Noise

The industry's lowest sound pressure levels were achieved by decreasing air flow volume, decreasing pressure loss with employment of one fan motor and optimizing casing and distributor shape.



Flap Control System



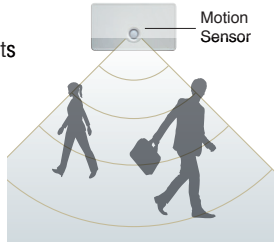
The flap can swing within the range of upper and lower flap position selected.

* The wireless remote control is not applicable to the flap control system.

Motion Sensor (Option)

Motion sensor is equipped in the panel and detects the presence/absence and activity of humans in a room to improve the comfort and energy saving performance of the unit.

LB-E



Improved Installation Workability

The refrigerant pipe from the unit can be arranged in three directions, rear, right and up. The drain pipe can be arranged in two directions, left and right. This will allow a free layout of piping for various installation conditions. The unit can only be serviced from the bottom.

Increased freedom of a piping layout

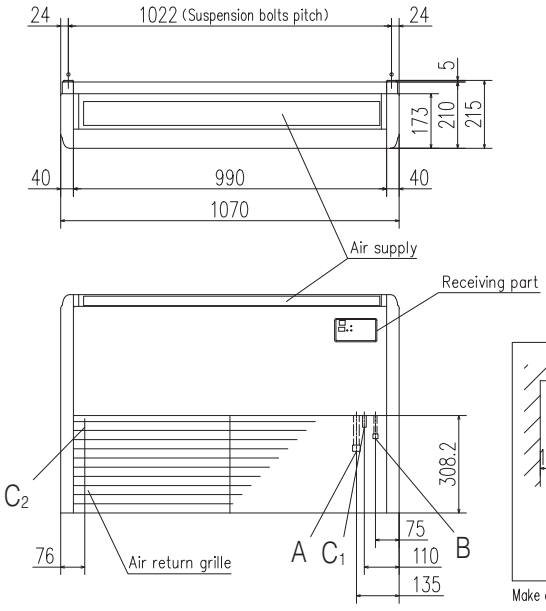
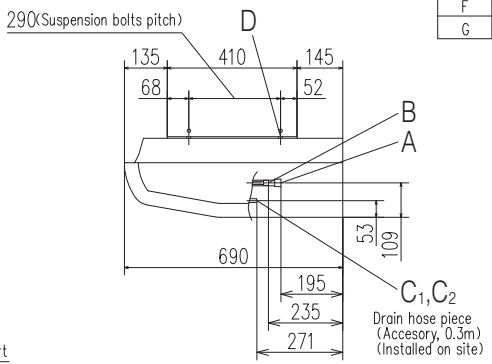
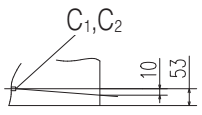
B	Liquid piping	ϕ6.35 (1/4") (Flare)
C 1,2	Drain piping	VP20 (I.D.20, O.D.26)
D	Hole for suspension bolts	(M10 or M8)
E	Back cutout	PE cover
F	Top cutout	Plate cover
G	Drain piping (for left back)	(Knock out)

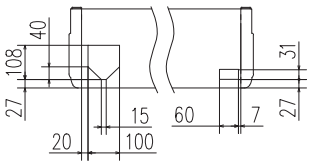
Note (1) The model name label is attached on the fan casing inside the air return grille.



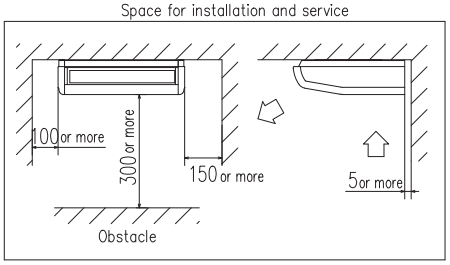




Note) The slope of drain piping inside the unit must take decline of 10mm.

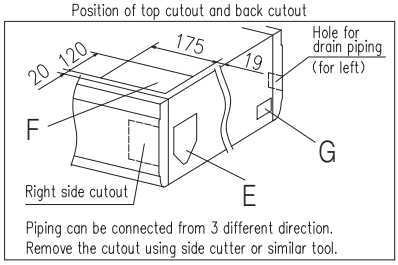


Space for installation and service



Make a space of 4000 or more between the units when installing more than one.

Position of top cutout and back cutout



Piping can be connected from 3 different direction.
Remove the cutout using side cutter or similar tool.

Remote control (option)				Wired:RC-EX3D, RC-E5, RC-ES1, RCH-E3 Wireless:RCN-E-E3			

NOTES:

The data are measured under the following conditions(ISO-T1, -H1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

NOTES:

The data are measured under the following conditions(ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
*3 : The values are for one indoor unit operation. (Multi system only)

The values are for simultaneous Multi operation.

NOTES:

The data are measured under the following conditions(R32 : ISO-T1, -H1 / R410A : ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
*3 : The values are for one indoor unit operation. (Multi system only)
*4 : In case of following conditions:Max.50m(Outdoor unit is higher & Outdoor temperature ≦ 43°C), Max.30m(Outdoor unit is higher & Outdoor temperature > 43°C)

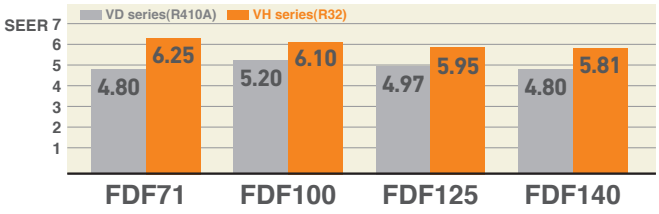
*Not all functions available with all remote control options.

High Efficiency

Energy efficiency is improved by New heat exchanger design (In case of Hyper INV).



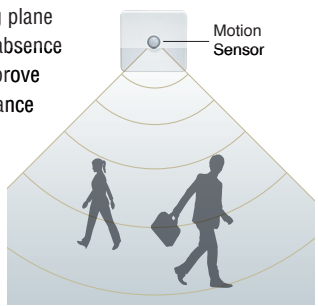
Wide and Powerful Air Flow

Wide and powerful air flow increase your comfort, realizing high efficiency in combination with our highly advanced outdoor units.

Motion Sensor (Option)

Motion sensor is equipped in the ceiling plane or wall plane and detects the presence/absence and activity of humans in a room to improve the comfort and energy saving performance of the unit.

LB-KIT2



Improved operability and visibility

Equipped with eco-touch remote control as standard equipment.
Various functions can now be controlled. (VH series)

Equipped with a leak detector device

Can now be safely used with the new refrigerant detector that detects leakage of the refrigerant. (VH series)

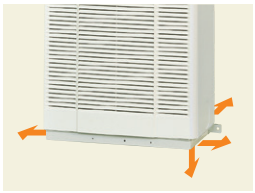
Remote control will integrate leak detector functions:
Audible and visible alarm

Leak detector

inside

Easy Transportation and Installation Workability

Piping and drain hose connection can be selected out of 4-directions and the selection makes installation workability more effective.
Due to slim design (Depth: 329mm, weight:49kg), easy transportation and installation are realized.



Easy Maintenance

The surface of heat exchanger can be appeared only removing the front panel. Easy cleaning of heat exchanger is possible.

NOTES:

The data are measured under the following conditions(R32 : ISO-T1, -H1 / R410A : ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
*3 : The values are for one indoor unit operation. (Multi system only)

The values are for simultaneous Multi operation.

	Outdoor	Cooling/Heating		100 / 100	100 / 100
Exterior dimensions	Indoor	HeightxWidthxDepth	mm	1850 x 600 x 329	
	Outdoor			1300 x 970 x 370	
Net weight	Indoor		kg	49	
	Outdoor			105	
Ref.piping size	Liquid/Gas		ømm	9.52(3/8") / 15.88(5/8")	
Refrigerant line (one way) length			m	Max.100	
Vertical height differences		Outdoor is higher/lower	m	Max.30 / Max.15	
Outdoor operating temperature range		Cooling	°CDB	-15 to 43*2	
		Heating	°CWB	-20 to 20	
Air filter, Q'ty				Plastic net x 1(Washable)	
Remote control				Wired:RC-E5 (installed) Wireless:RCN-KIT4-E2 (option)	

NOTES:

The data are measured under the following conditions(R32 : ISO-T1, -H1 / R410A : ISO-T1).
Cooling:Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating:Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is –5°C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.
*3 : The values are for one indoor unit operation. (Multi system only)

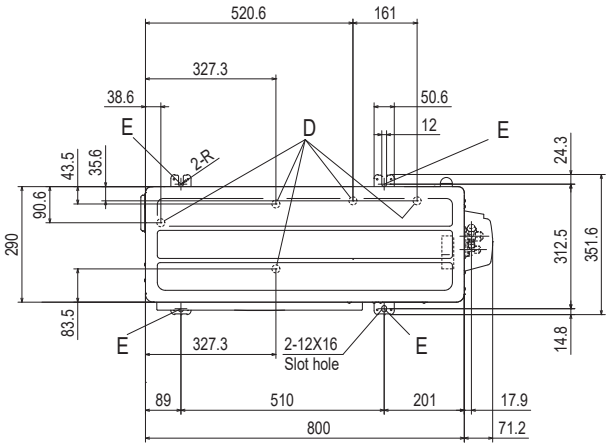
Outdoor operating temperature range		Cooling	°CDB	-15 to 46*2		
		Heating	°CWB	-15 to 20		
Air filter, Q'ty				Plastic net ×1(Washable)		
Remote control (option)				Wired : RC-EX3D, RC-E5, RC-ES1, RCH-E3 Wireless : RCN-KIT4-E2		

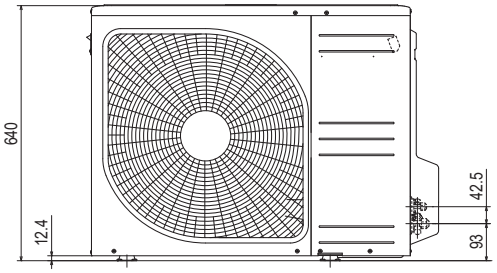
NOTES:

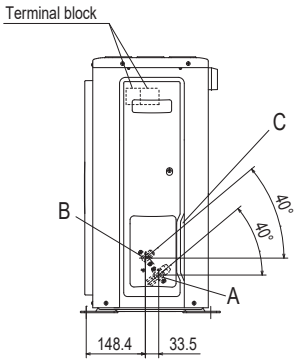
The data are measured under the following conditions(R32 : ISO-T1, -H1).
Cooling:Indoor temp. of 27˚CDB, 19˚CWB, and outdoor temp. of 35˚CDB. Heating:Indoor temp. of 20˚CDB, and outdoor temp. of 7˚CDB, 6˚CWB.
*1 : Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.
*2 : If a cooling operation is conducted when the outdoor air temperature is –5˚C or lower, the outdoor unit should be installed at a place where it is not influenced by natural wind. If wind blows, the low pressure will drop and compressor frequency will increase, this will cause the capacity to drop and may cause the unit to break down.

Outdoor Unit Dimensions (Unit:mm)

SRC40ZSX-W1, 50ZSX-W3, 60ZSX-W3



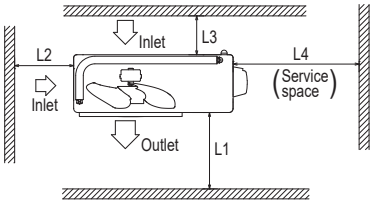




Symbol	Content	
A	Service valve connection (Gas side)	φ12.7(1/2")(Flare)
B	Service valve connection (Liquid side)	φ6.35(1/4")(Flare)
C	Pipe/cable draw-out hole	
D	Drain discharge hole	φ20×5 places
E	Anchor bolt hole	M10-12×4 places

Notes

(1) The unit must not be surrounded by walls on the four sides.
(2) The unit must be fixed with anchor bolts. An anchor bolt must not protrude more than 15mm.
(3) If the unit is installed in the location where there is a possibility of strong winds, place the unit such that the direction of air from the outlet gets perpendicular to the wind direction.
(4) Leave 200mm or more space above the unit.
(5) The wall height on the outlet side should be 1200mm or less.
(6) The model name label is attached on the front side of the unit.



Minimum installation space

Wired remote control Option

RC-EX3D

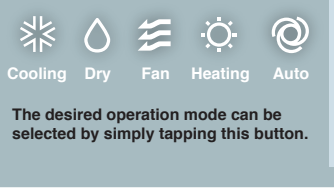
Intuitive touch controller with Liquid Crystal Display

H120 x W120 x D19 mm

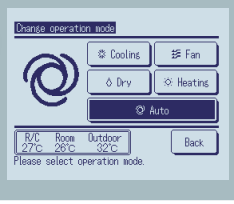
User friendly

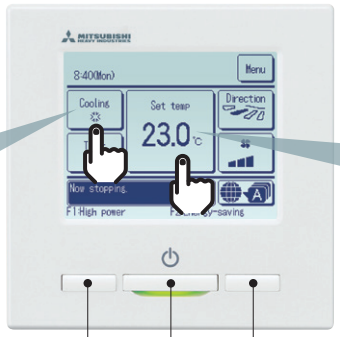
- The industry's first LCD panel with light tap operation has been introduced
- Simple interface with only three buttons

Operation mode setting screen



The desired operation mode can be selected by simply tapping this button.

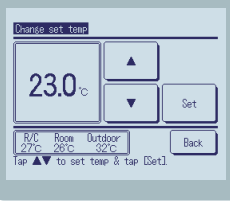




Easy view

- Big LCD with 3.8 inch full dot display
- Back light function
- Multi-language display (9 languages)

Setting temperature screen



To set your desired temperature, simply tap ▲▼ button.

High power operation

The highest capacity operation (Max 15 minutes)
- Increasing compressor speed
- Increasing air flow volume

Run / Stop

Energy-saving operation

- Changes set temperature. At 28˚C in cooling mode and 22˚C in heating mode, 25˚C in auto mode.
- Adjustment of operation based on outdoor temperature.

Main functions

	Function name	Description
Economy & Timer	Energy-saving operation	Since the capacity is controlled automatically based on the outdoor temperature, energy can be saved without losing comfort.
	Sleep timer	Specify the start and stop time for the operation. The selectable range of setting time is from 30 to 240 minutes (at 10-minute intervals).
	Set temperature auto return	The temperature automatically returns to the previously set temperature.
	Set ON timer by hour	When the predetermined time is reached, the air-conditioner automatically turns on.
	Set OFF timer by hour	When the predetermined time is reached, the air-conditioner automatically turns off.
	Set ON timer by clock	The air-conditioner turns on at the set time.
	Set OFF timer by clock	The air-conditioner turns off at the set time.
	Weekly timer	On or Off timer can be set on a weekly basis.
	Peak-cut timer	Capacity control can be set by using peak cut function on RC-EX3D for better energy saving. Five-step capacity control is available.
	Home leave operation	When the unit is not used for a long period, the room temperature is maintained at a moderate level, avoiding extremely hot or cool temperatures.
Comfort	Big LCD & Touch screen panel	Large 3.8 inch screen has resulted in improved visibility and operability.
	Easy modification of individual flap control	User can visually confirm and set the direction of flap using the visual display on the remote control.
	Automatic fan speed *1	The micro-computer automatically adjusts the airflow effectively to follow the changes of return air temperature.
	Temp increment setting	Temperature increments for changes in the set temperature can be adjusted.
	Silent mode	Set the period of time to operate the Outdoor unit with prioritizing the quietness.

	Function name	Description
Convenience	Function switch *1	The function switch allows user to select and set two functions among available functions .
	Favourite setting *1	Operation mode, set temperature, fan speed and air flow direction automatically adjust to the programmed favourite setting.
	Adjusting Brightness of the operation lamp	The brightness of the background light can be adjusted by 10 stages.
	LCD contrast setting	This function allows user to adjust LCD display contrast.
	High power operation	High Power Mode increases the unit operating ability for 15 minutes to quickly adjust the room temperature to a comfortable level.
	Back light setting	This convenient function allows user to see controls under low light conditions.
	Administrator settings	This function only allows specific individuals to operate the unit.
	Setting temp range	Limited range of setting temperature in the heating or the cooling operation can be selected.
	External Input / Output Function	The external input/output of indoor unit by remote controller can set input/output based on user needs.
	Select the language	Set the language to be displayed on the remote control.
Service	USB connection (mini-B)	This function allows batch input of schedule timer settings and other settings involving a large amount of data.
	Error code display	This function allows user to check information displayed when abnormal function of the unit occurs.
	Operation data display	Displays various types of air-conditioner operation data in real time.
	Contact company display	Address of the service contact is displayed.
	Filter sign	Announces the due time for cleaning of the air filter.
	Static pressure adjustment	Allows user to adjust duct static pressure using the remote control.
	Backup Control	Allows for rotation control, fault backup control, and capacity backup control.

*1 Cannot be used when a centralized control remote is connected.

Wired remote control

Option

RC-E5

H120 x W120 x D19 mm

The RC-E5 control enables extensive access to service and maintenance technical data combined with easy to use functions and a clear LCD display.

- Weekly timer function as standard
- Timer operation
- Run hour meters to facilitate maintenance checking
- Room temperature controlled by the remote control sensor
- Adjustable set temperature ranges

Design remote control

Option

RC-ES1 (Wired) New!

H86 x W86 x D17 mm

- Simple and sophisticated design
- Compact size (86×86mm)
- Remote control with Bluetooth® wireless technology

Wireless connection

Remort control with Bluetooth® wireless technology.
Easy set-up of indoor units.
Notifications of abnormal conditions or operational data from the remote control will be sent to your smartphone.

The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by MITSUBISHI HEAVY INDUSTRIES THERMAL SYSTEMS, LTD. is under license.

Simple remote control

Option

RCH-E3 (Wired)

H120 x W70 x D15 mm

Designed specially for hotel rooms, the controller's buttons are limited only to the minimum required functions such as ON/OFF, mode, temperature setting and fan speed. It is really simple and easy to use.

* RCH-E3 is not applicable to the Individual flap control system. When RCH-E3 is used, the fan has 3 speed settings (Hi-Me-Lo) only.

Up to 16 units

It can control up to 16 indoor units, by pressing the AIR CON No. button.

AUTO restart

This function allows starting the air conditioner automatically when power supply is restored after power failure or by turning on the power switch.

Wireless remote control

Option

RCN-T-5BW-E2
RCN-T-5BB-E2

For wireless control simply insert the infrared receiver kit on a corner of the panel.

* Wireless remote control is not applicable to the Individual flap control system.

RCN-TC-5AW-E3

RCN-KIT4-E2

RCN-E-E3

Thermistor

Option

SC-THB-E3

In case the sensor integrated in the indoor unit or in the remote controller is unable to sense the room temperature correctly, or an individual controller in each room is not required but a temperature sensor is (as when a central control system is in place), install SC-THB-E3 in an adequate location in the room.

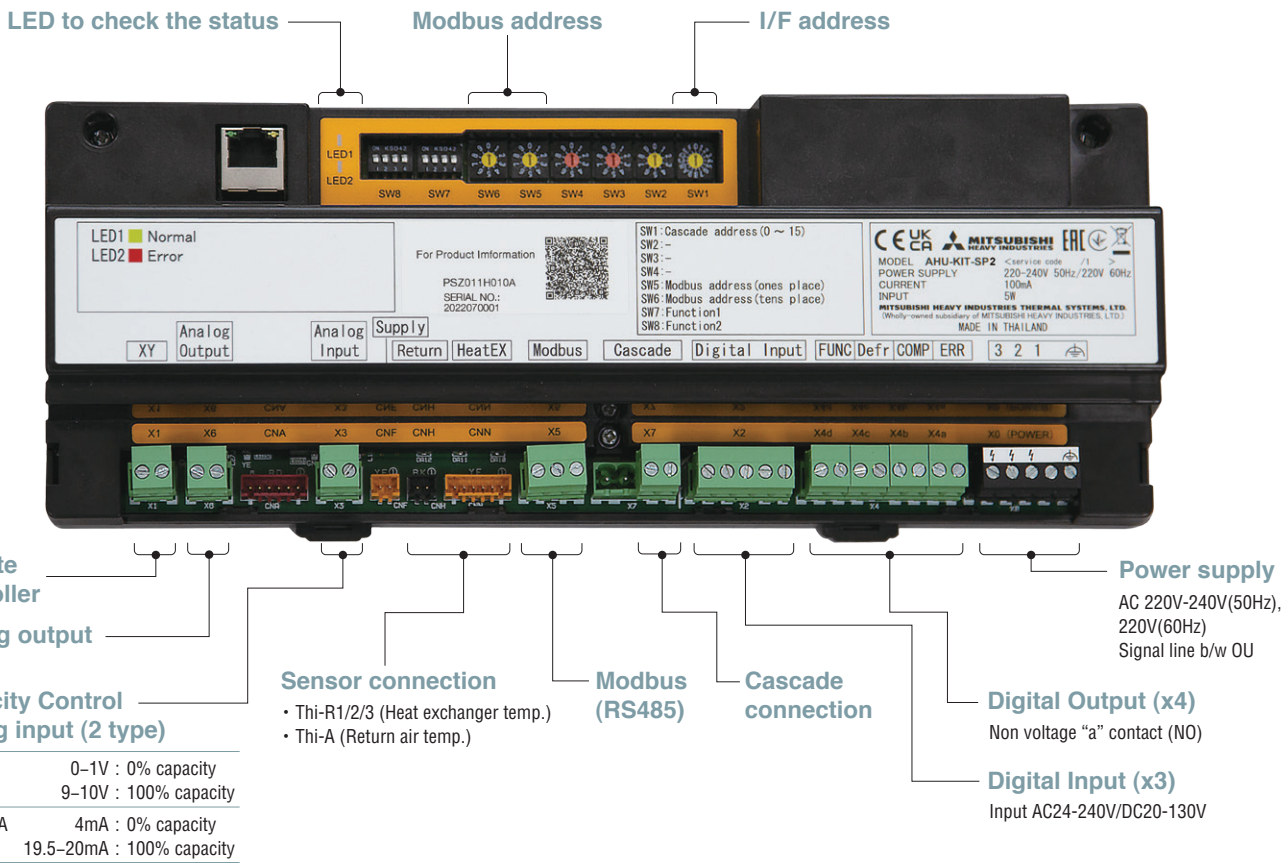
Air Handling Unit Interface

AHU-KIT-SP2

The AHU controller will function as an interface between MHI's PAC outdoor units and locally produced heat exchanger for Air Handling Unit (AHU).

- Compact AHU interface for MHI's Split system
- 0-10V/4-20mA capacity control
- Various external I/O
- Modbus connection
- Cascade control
- Set temperature control

Main components



Main functions

Model		AHU-KIT-SP2
Size		W290 x H109.5x D57mm
External Input	Capacity control	○ 0-10V DC, 4-20mA(0-100%)
	Cooling / Heating	○
	Operation On/Off	○
	Emergency stop	○
External Output	Comp On/Off	○
	Run/Stop	○
	Defrost On/Off	○
	Error	○
Modbus (RS-485)		○
Cascade connection		○ Max 16
Standard		EN60335-1

Compatibility PAC & RAC outdoor unit will be in scope.

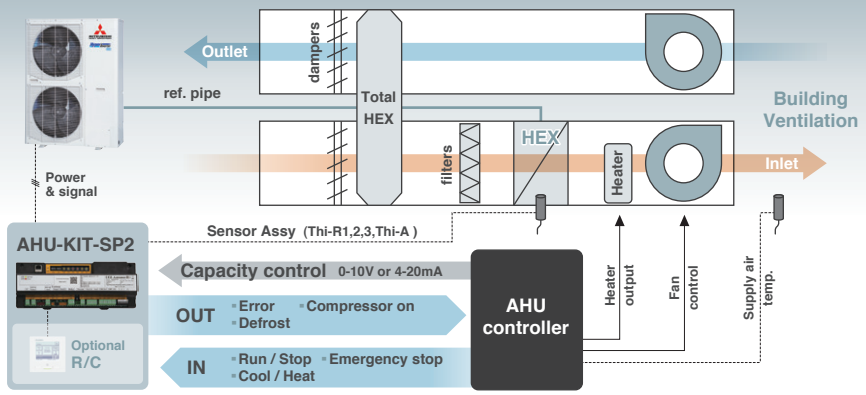
Capacity	R32	R410A
Small	SRC40/50/60ZSX-W1,W3	–
	FDC71VNX-W	–
Medium	FDC100/125/140VNA-W	FDC100/125/140VNA
	FDC100/125/140VSA-W	FDC100/125/140VSA
	FDC100/125/140VNX-W	FDC100/125/140VNX
	FDC100/125/140VSX-W	FDC100/125/140VSX
Large	FDC200/250/280VSA-W	FDC200/250VSA

System Examples & Advantages

Ex1. General AHU

1. 0-10V/4-20mA capacity control
2. Various I/O for better control
3. R/C can be removed

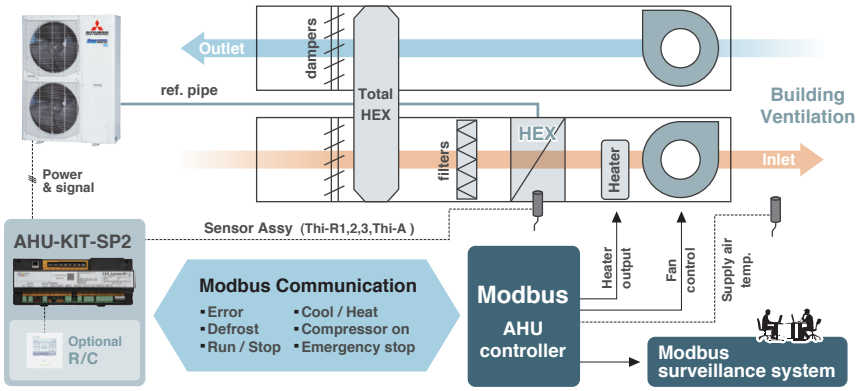
Compatible with market standard AHU controller.
Provide wide flexibility for AHU solution.



Ex2. Modbus AHU

1. Modbus connection
2. Same control as external I/O

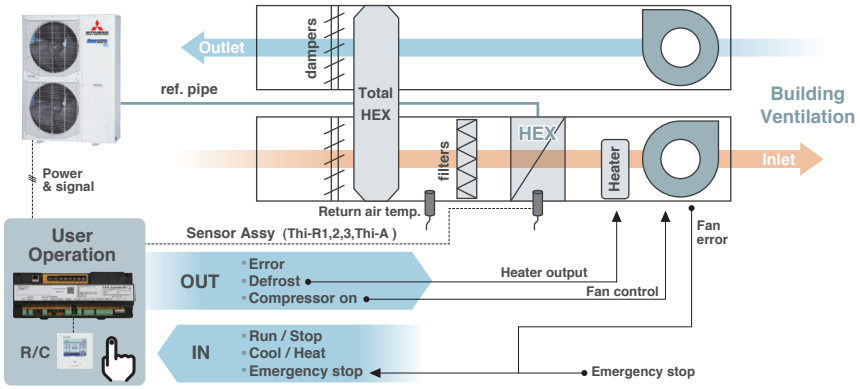
BMS connectability without any extra device.



Ex3. Simple AHU

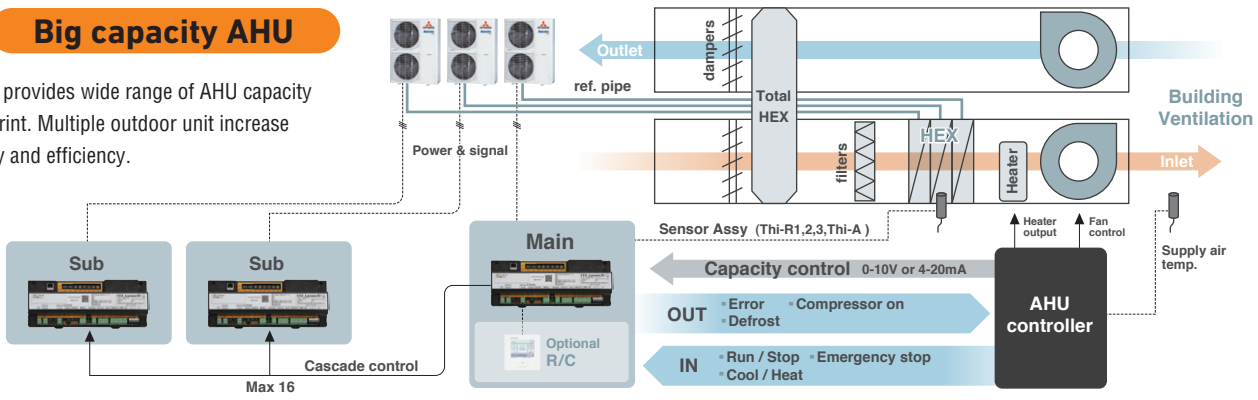
1. Remote contoller connection
2. Adequate external input/output

Simple stand-alone AHU control by set temperature control from RC.



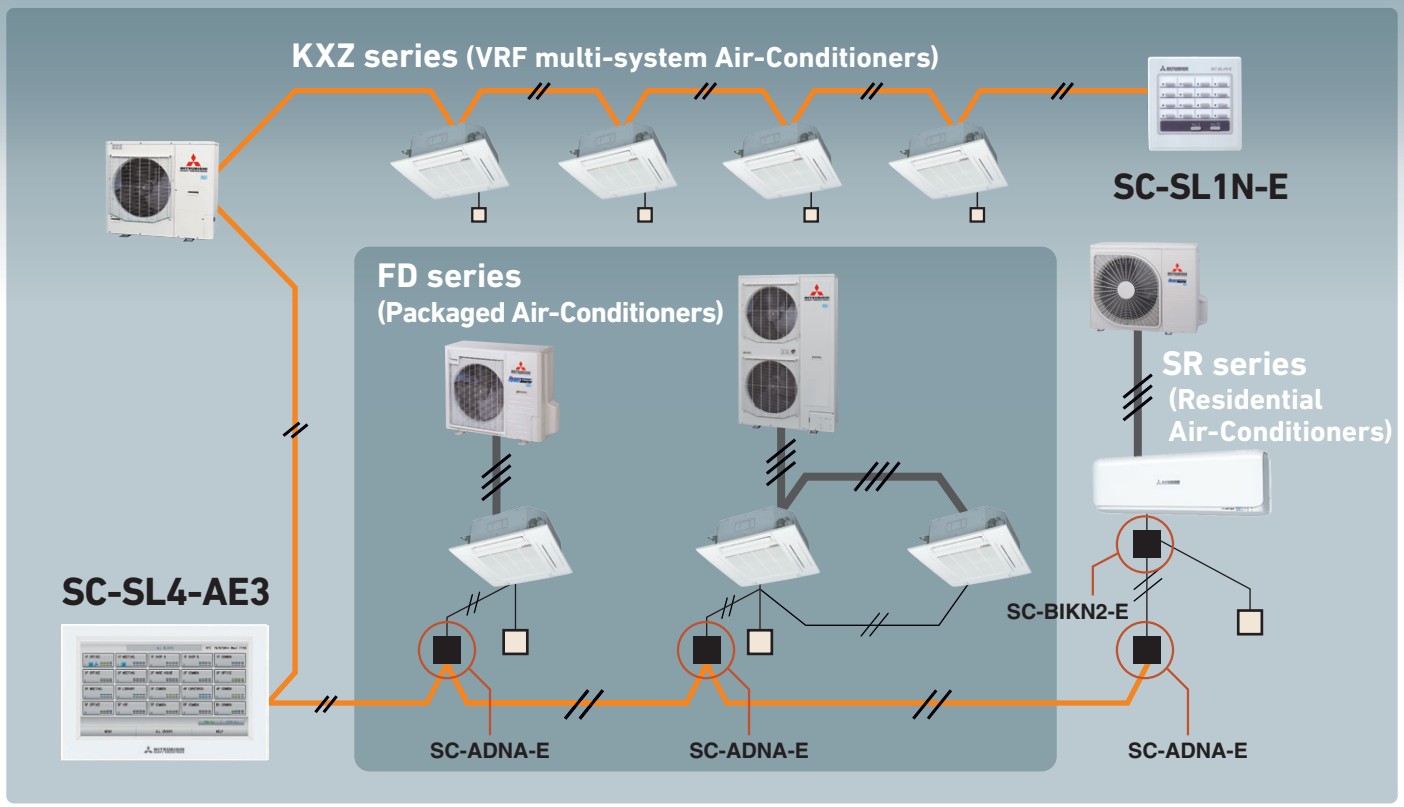
Ex4. Big capacity AHU

Cascade control provides wide range of AHU capacity with small footprint. Multiple outdoor unit increase system reliability and efficiency.



SUPERLINK-Ⅱ

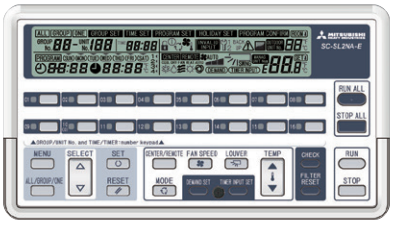
- Control Systems -



Central Control

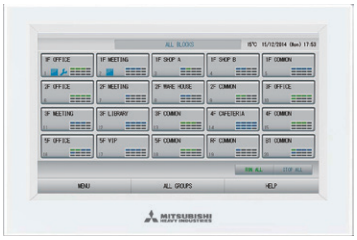
SC-SL1N-E

Start/stop control of up to 16 indoor units is possible either individually or collectively. With simple operations, you can achieve centralized control.



SC-SL2NA-E

Centralized control of up to 64 indoor units. Including weekly timer function as standard.



SC-SL4-AE3,-BE3

Easy operation thanks to with a large colour LCD and touch panel. Up to 128 indoor units can be controlled, when SUPERLINK-Ⅱ systems are connected.

Building Management Systems

Production by order

SC-WBGW256*

WEB & BACnet Gateway

SC-WBGW256, up to 256 cells (some cells can have two or more indoor units and total number of indoor units can be up to 256 units) are controlled from the Internet Explorer and centrally from Building Management Systems.

Users can manage up to 1024 units by connecting the four devices !!

* Additional engineering service is required. Please consult your dealer when using these system.

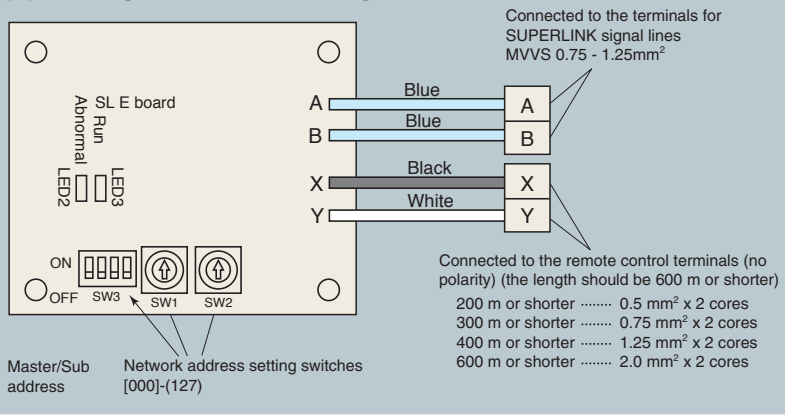
SUPERLINK E BOARD (SC-ADNA-E)

This board is used when conducting control of the single package (wired remote control unit) 1-type series using a network option (SC-SL1N-E, SC-SL2NA-E, etc).

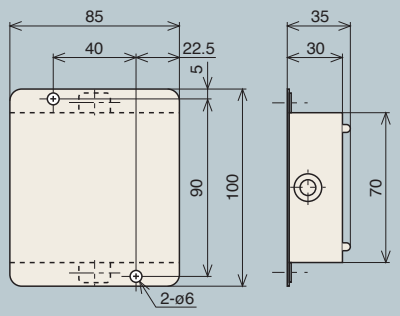
(1) Functions

(a) Transmits the settings from the network option to the indoor units.
(b) Returns the priority indoor unit data in response to a data request from the network option.
(c) Inspects the error status of connected indoor units and transmits the inspection codes to the network option.
(d) A maximum of 16 units can be controlled (if in the same operation mode).

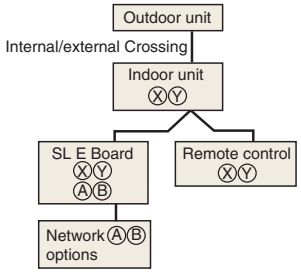
(2) Wiring connection diagram



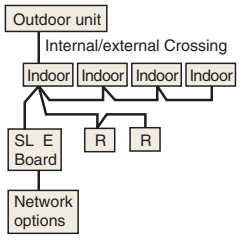
(3) Metal box dimension (unit:mm)



Basic Connections

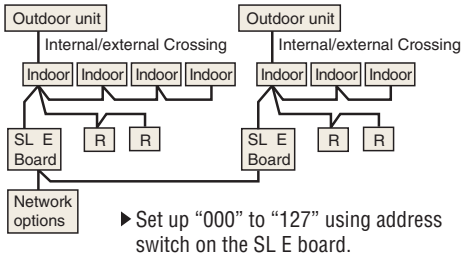


Plural Controls by Multiple Remote Controls. Mixture of Multiple Units



- Transmit the information of plural "Master" units to the network.
- Transmit the abnormalities of the "Slave" units to the network.
- ▶Setting the plural "Master/Slave" units with the dip SW of the printed circuit board.
- ▶Setting the "Master/Slave" remote controls with the dip SW of the remote control board.

Plural Controls by Multiple Remote Controls. Mixture of Multiple Units

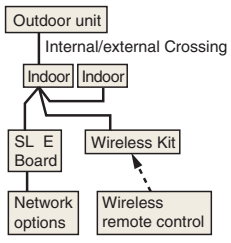


▶Set up "000" to "127" using address switch on the SL E board.

Without Remote Control

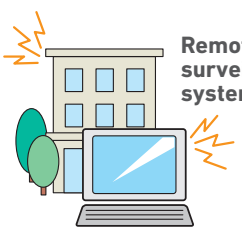
▶Set the SL E board dip SW to "Master" SW3-1 ON.
*The network option SL1N-E is not allowed (This will disturb switching of the operation mode)

Wireless Kit

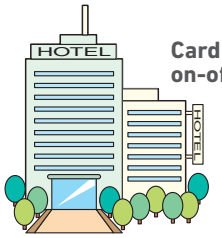


External switch connection CNT, CNTA

All indoor units are equipped with an additional connection point CnT to connect indoor units to an external ON/OFF switch; e.g. time clock, fire alarm, etc.



Remote surveillance system



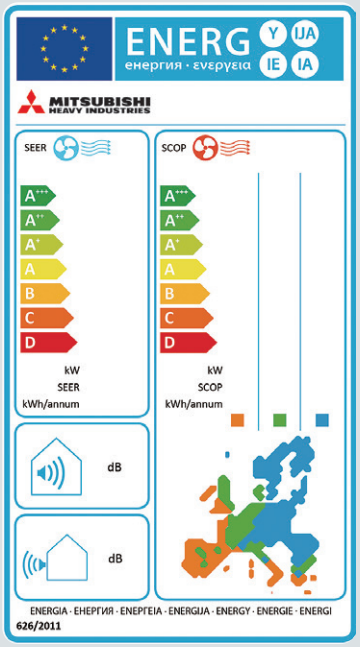
Card key on-off

Energy Efficient and Environmentally Conscious

Several radical design changes and engineering developments have brought about a vast improvement in energy efficiency and environmental protection.

ENERGY LABEL

SEER and SCOP is defined in European regulations listed below.



No.626/2011 of 4 May 2011:
energy labeling of air-conditioners
(below cooling capacity 12kW).

No.206/2012 of 6 March 2012:
requirement for air-conditioners and comfort fans.

Seasonal efficiency is the method of rating the true efficiency of heating and cooling products over an entire year.
Set by the EU's new regulation implementing Eco-Design Directive for Energy related Product (ErP) which specifies the minimum efficiency of air-conditioners manufacturers must integrate into their products.
The Seasonal Efficiency rating system that must be used for heating and cooling by all manufacturers are;
SEER - Seasonal Efficiency Ratio (value in cooling)
SCOP - Seasonal Coefficient of Performance (value in heating)
The new rating system will indicate the true efficiency of the energy using product at specified condition.

Employment of lead-free solder

Adapted to RoHS directive

RoHS:Restriction of Hazardous substances

In order to avoid the release of hazardous substances into the environment, all models have utilised lead-free solder application. It has been considered to be difficult to use lead-free solder for practical applications because it requires higher solder temperatures at assembly, which can jeopardize reliability. However our PbF soldering method can produce a higher quality lead-free printed circuit board.

Employment of R32 R410A

All models use refrigerant R32 or R410A characterized by the ozone depletion coefficient being 0.

Excellent Energy Saving

High performance and excellent energy savings are achieved at the same time by heat exchanger's increased capacity and employment of high efficiency DC motor.

- Refrigerant contained in the products is a fluorinated greenhouse gas listed in Regulation (EU) No 517/2014.
- SEER/SCOP are based on EN14825.2016 and Commission regulation(EU) No.2016/2281. Temperature conditions for calculating SCOP are based on "Average climate".
- 'tonne(s) of CO_2 equivalent' means a quantity of greenhouse gases- expressed as the product of the weight of the greenhouse gases in metric tonnes and of their global warming potential.

- Refrigerant contained in the products is a fluorinated greenhouse gas listed in Regulation (EU) No 517/2014.
- SEER/SCOP are based on EN14825.2016 and Commission regulation(EU) No.2016/2281. Temperature conditions for calculating SCOP are based on "Average climate".
- 'tonne(s) of CO_2 equivalent' means a quantity of greenhouse gases- expressed as the product of the weight of the greenhouse gases in metric tonnes and of their global warming potential.

SEER and SCOP is defined in European regulations listed below.

No.2016/2281: requirement for air-heating products, cooling products, high temperature process chillers and fan coil units.Seasonal efficiency is the new way of rating the true efficiency of heating and cooling products over an entire year.
Set by the EU's new regulation implementing Eco-Design Directive for Energy Related Product (ErP) which specifies the minimum efficiency of air-conditioners manufacturers must integrate into their products.
The new Seasonal Efficiency rating system that must be used for heating and cooling by all manufacturers are;

Before starting use

Heating performance
The heating performance values (kW) described in the catalogue are the values obtained by operating at an outdoor temperature of 7°C and indoor temperature of 20°C as set forth in the ISO Standards.
Heating performance is reduced as the temperature drops. If the outdoor temperature is too low and the heating performance is insufficient, use other heating appliances as well.

Indication of sound values
The sound values are the values (A scale) measured in a chamber such as an anechoic chamber following the ISO Standards. In the actual installation state, the value is normally larger than the values given in the catalogue due to the effect of surrounding noise and echo. Take this into consideration when installing.

Use in oil atmosphere
Avoid installing this unit in an atmosphere where oil scatters or builds up, such as in a kitchen or machine factory.
If the oil adheres to the heat exchanger, the heat exchanging performance will drop, mist may be generated, and the synthetic resin parts may deform and break.

Use in acidic or alkaline atmosphere
If this unit is used in acidic atmosphere such as hot spring areas having high level of sulfuric gases or in alkaline atmosphere including ammonia or calcium chloride, places where the exhaust of the heat exchanger is sucked in, or at coastal areas where the unit is subject to salt breezes, the outer plate or heat exchanger, etc., will corrode. Please ask a dealer or specialist when you use an air-conditioner in places differing from a general atmosphere.

Use in places with high ceilings
If the ceiling is high, install a circulator to improve the heat and air flow distribution when heating.

Refrigerant leakage
The refrigerant (R32, R410A) used for air-conditioner is non-toxic and in its original state.
However, in consideration of a state where the refrigerant leaks into the room, measures against refrigerant leaks must be taken in small rooms where the tolerable level could be exceeded. Take measures by installing ventilation devices, etc.

Use in snowy areas
Take the following measures when installing the outdoor unit in snowy areas.

·Snow prevention
Install a snow-prevention hood so that the snow does not obstruct the air intake port or enter and freeze in the outdoor unit.

·Snow piling
In areas with heavy snow fall, the piled snow could block the air intake port. In this case, a frame that is 50cm or higher than the estimated snow fall must be installed underneath the outdoor unit.

Automatic defrosting device
If the temperature is low, and the humidity is high, frost will stick to the heat exchanger of the outdoor unit. If continued to use, the heating performance will drop.
The "Automatic defrosting device" will function to remove this frost. After heating for approx. three to ten minutes, it will stop, and the frost will be removed. After defrosting, hot air will be blown again.

Servicing
After the air-conditioner has been used for several seasons, dirt will build up in the air-conditioner causing the performance to drop. In addition to regular servicing, a maintenance contract by a specialist is recommended.

Safety Precautions

Air-conditioner usage target
The air-conditioner described in this catalogue is a dedicated cooling/heating device for human use.
Do not use it for special applications such as the storage of food items, animals or plants, precision devices or valuable art, etc.
This could cause the quality of the items to drop, etc.
Do not use this for cooling vehicles or ships. Water leakage or current leaks could occur.

Before use
Always read the "User's Manual" thoroughly before starting use.

Installation
Always commission the installation to a dealer or specialist. Improper installation will lead to water leakage, electric shocks and fires.
Make sure that the outdoor unit is stable in installation. Fix the unit to stable base.

Usage place
Do not install in places where combustible gas could leak or where there are sparks.
Installation in a place where combustible gas could be generated, flow or accumulate, or places containing carbon fibers could lead to fires.
